

Climate Smart Extractive Industries

Senator David Wells
@wellsdavid
Canada

The Bow Tie Method

The Bow Tie Method

Preventative Controls

- Environmental Assessments
- Hazard analysis safety standards
- Weather forecasts
- Sea-state prohibitions
- Trained operators
- Certified captains
- Pilotage in high-risk areas
- Regular monitoring

Event

Recovery Controls

- Protective equipment
- Blow-out preventers
- Double-hulling of vessels
- Rapid response teams
- Clean-up crews
- Heavy oil skimmers
- Oil booms

*Extractive industries can
operate safely and effectively if
the right systems and
mitigations are in place*
