carbon neutrality by 2050.

COP25

In Conclusion

- Chile assumes the presidency of COP25 considering our commitment to multilateralism.
- Climate change is a collective task and should be addressed with the cooperation of all involved actors.
- COP25 seeks to identify opportunities for collaboration on specific topics, such as the oceans, Antarctica, forests, and the circular economy.
- COP25 will be an opportunity for all parties to raise their ambition to reduce emissions and take further global climate action with non-state actors like the private sector, civil society, the scientific community, and academia.

TIME FOR ACTION

Thank you
