Fundadora / Founder
Digital Moment

Governments

- **Government employees need to learn how AI works**
 - How it is designed, developed, deployed
 - Ethical implications
- **Wide public consultation & Education**, including Indigenous populations; recommendations to government (eg in Canada, recommendations include education, public awareness campaign, online learning tool *(eg Public Awareness Working Group)*)
- Review of existing **laws**; and where needed, new ones to protect the public
 - Regulate international and interprovincial trade and commerce in artificial intelligence systems
 - Make companies accountable
 - *Eg Artificial Intelligence and Data Act (AIDA)*

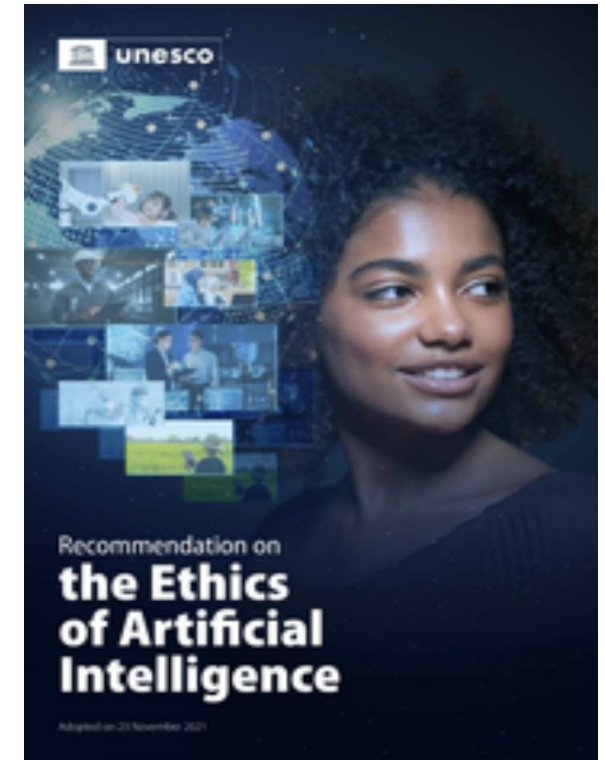

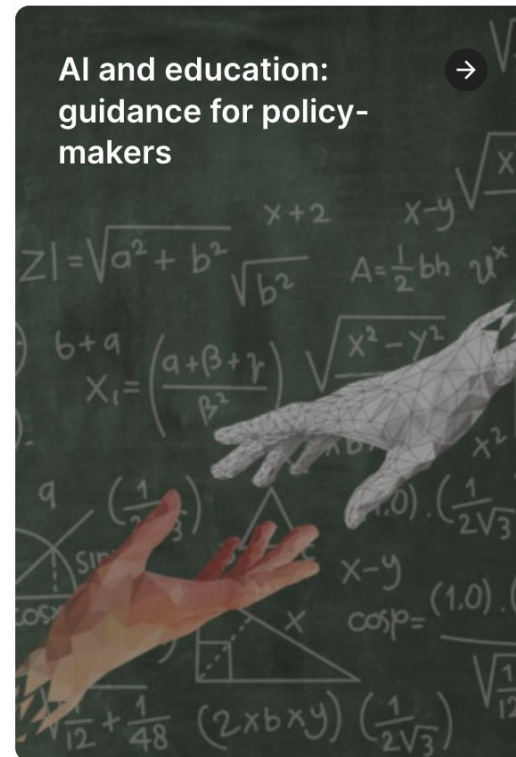

Education - Critical Thinking
