Verónica Cano Christiny
CELADE-Population Division, ECLAC

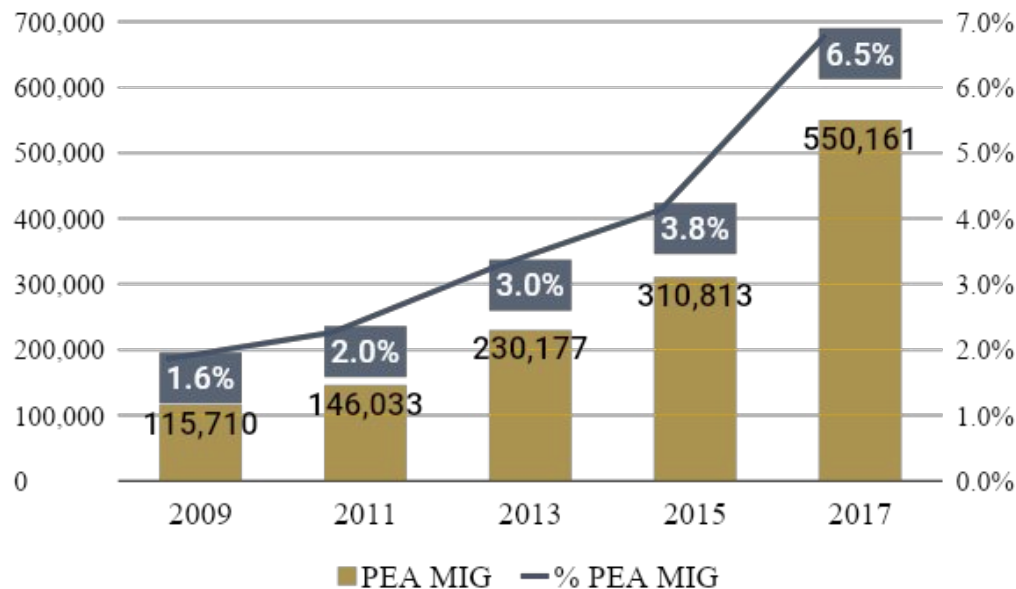

Labour participation: Chile

In **Chile**, the **work force** of **migrant** origin **increased** on average at a rate of 20% per year between 2009 and 2017

In 2020 the **migrant work force** reached 8.7%, and it was 11.7% of the total work force in 2022

International labour immigration makes it possible to **cover the labour shortages** that occur as a result of population aging

Chile, 2009-2017. Migrant workers

Labour participation: Costa Rica

Migration can be characterized as **predominantly labour-related**, which can be explained by development differences among countries, which (increasingly in a forced manner) has people seeking better opportunities

In **Costa Rica migrants** have **greater participation in the labour market** compared to non-migrants

Costa Rica: employment rate by sex and migrant status, 2010-2020

(In percentages)

The employment rate in percentage terms is greater among migrants, for both sexes

Fuente:

Elaboración propia con datos de la ECE del INEC

Labour contribution: Peru

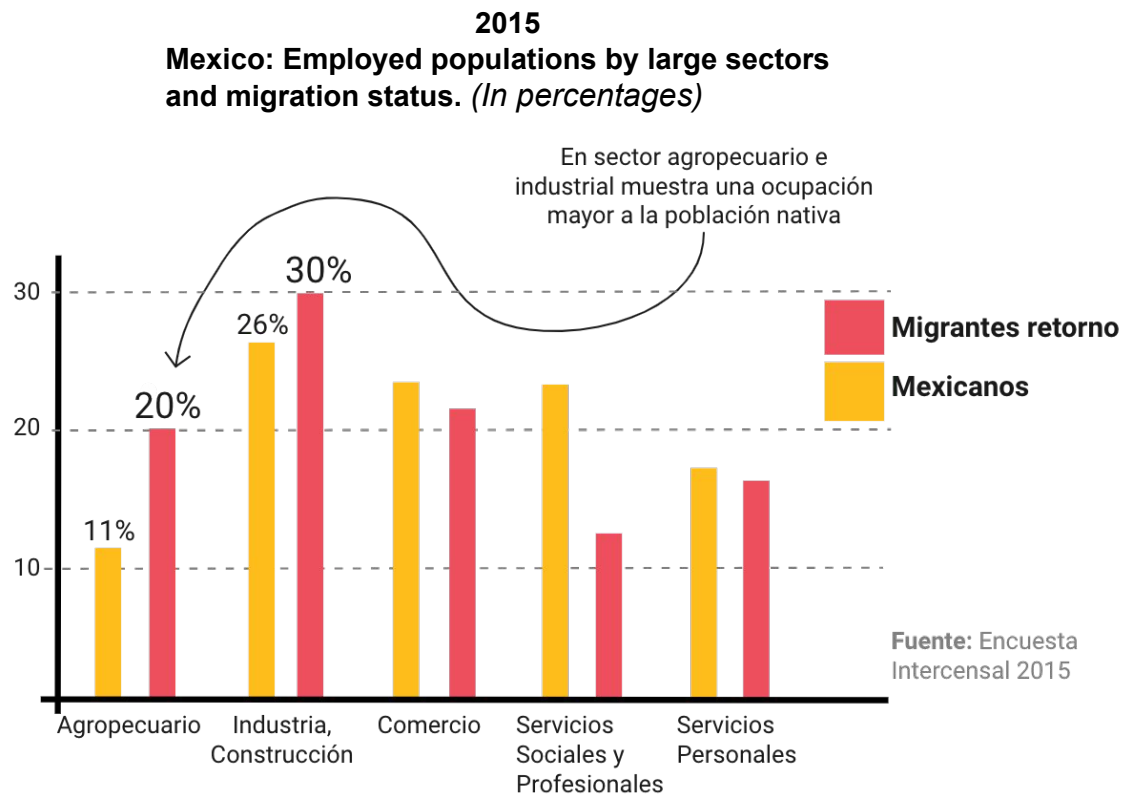

According to the 2019 National Household Survey (ENAHU), **82.8%** of migrants' employment is in low-skill sectors

Peru: evolution of employment rates for the immigrant population according to skill level (%), 2014-2019

Labour contributions: Return migrants, Mexico

In **Mexico**, return **migrants** are young and have lower levels of schooling. They are generally in productive activities in **industry and construction** and the **agricultural sector**.

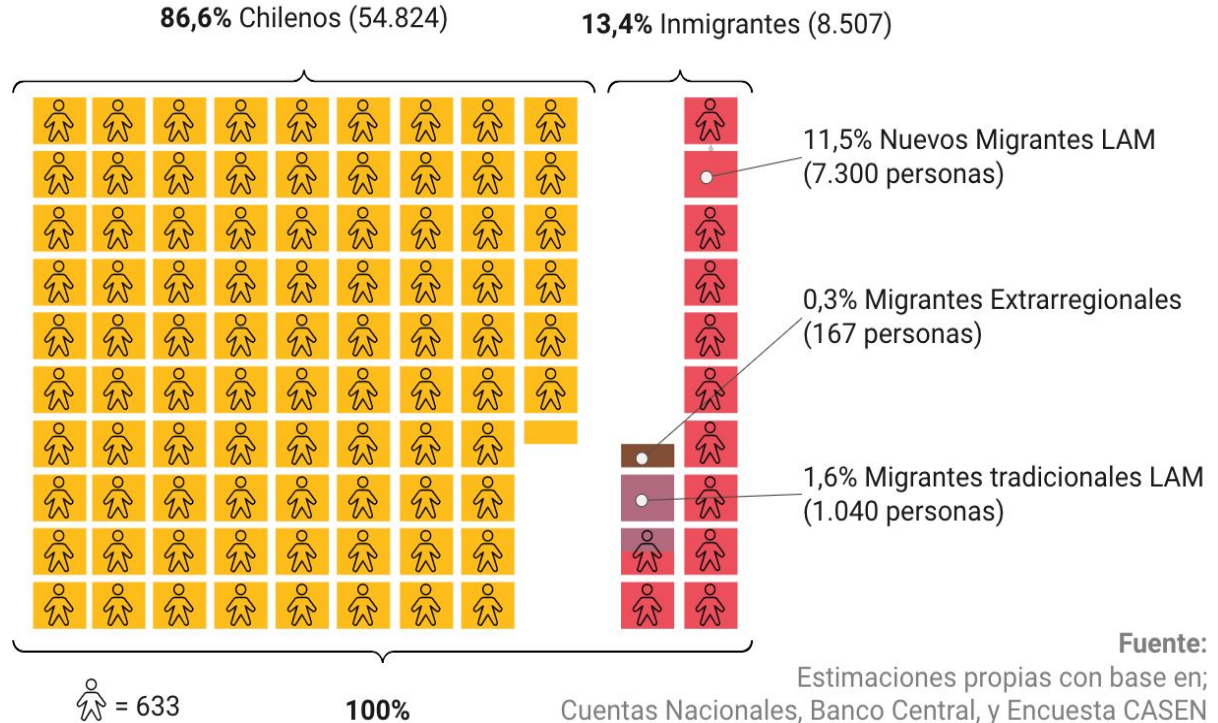

Contribution to GDP: Chile

Migration contributes **labour** to productive sectors of the economy: **it has a positive impact on GDP.**

In **Chile**, **13.4%** of GDP growth is contributed by migrants' labour.

Chile: composition of GDP growth according to migration origin of the work force, 2009-2017 (In percentages)

Fuente:

Estimaciones propias con base en; Cuentas Nacionales, Banco Central, y Encuesta CASEN

Tax contributions: Costa Rica and Peru

When accessing taxable goods and services, migrants **contribute to tax revenue.**

As in the case of **Costa Rica and Peru** where the positive impact on GST can be seen (*General Sales Tax*).

In addition, those who are **regularized** contribute **income tax** and **social security** contributions

Costa Rica: Monthly amount in colones paid to GST by household income quintiles and migration status, 2018 (In colones)

Fuente: Elaboración propia con datos de la ENIGH 2018 del INEC

Peru: Contribution of the migrant population to GST, 2014-2019 (Millions of soles)

Contributions to origin countries: in Jamaica remittances represent a quarter of the GDP

Jamaica: annual remittances, in millions of dollars (left axis) and as a percentage of the GDP (right axis) 1990-2020

Resilience of migrants' contributions: the growth of remittances during the pandemic

Latin America and the Caribbean (selected countries):
Variation rate of income from emigrant remittances, 2020, 2021 and 2022 (percentages)

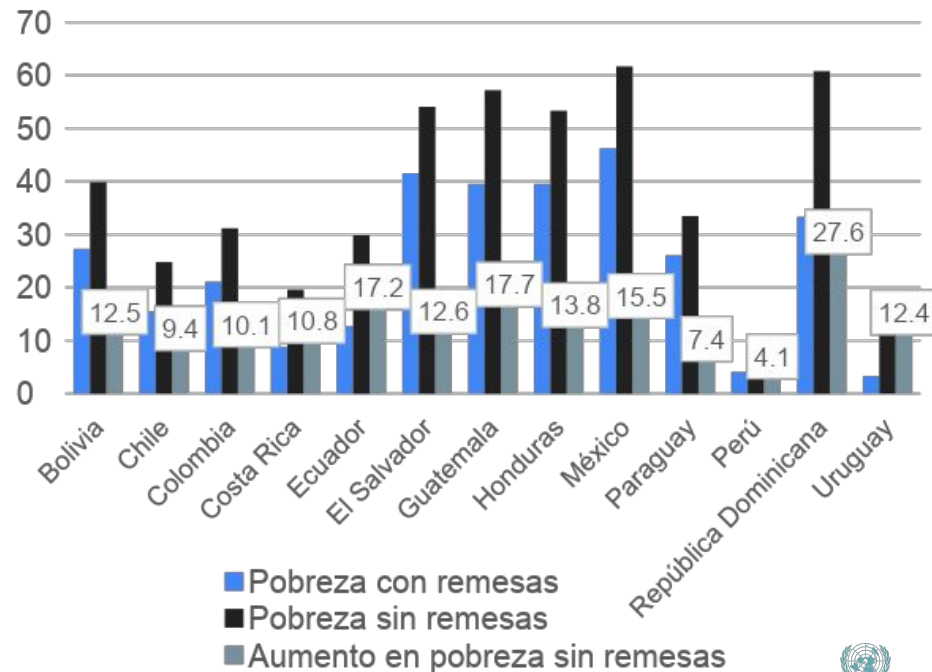

Source: ECLAC,
Economic Survey of
Latin America and
the Caribbean 2022

Remittances are determinants in alleviating poverty for those who receive them, with a differential impact on the general poverty rate

a. Total population, around 2017

b. Total remittance-recipient population, around 2017
