Panel / Panel

Contribution of international migration to sustainable development

Simone Cecchini
Chief of the Latin American and Caribbean
Demographic Centre (CELADE) - ECLAC

The public debate is dominated by the problems and challenges of international migration.

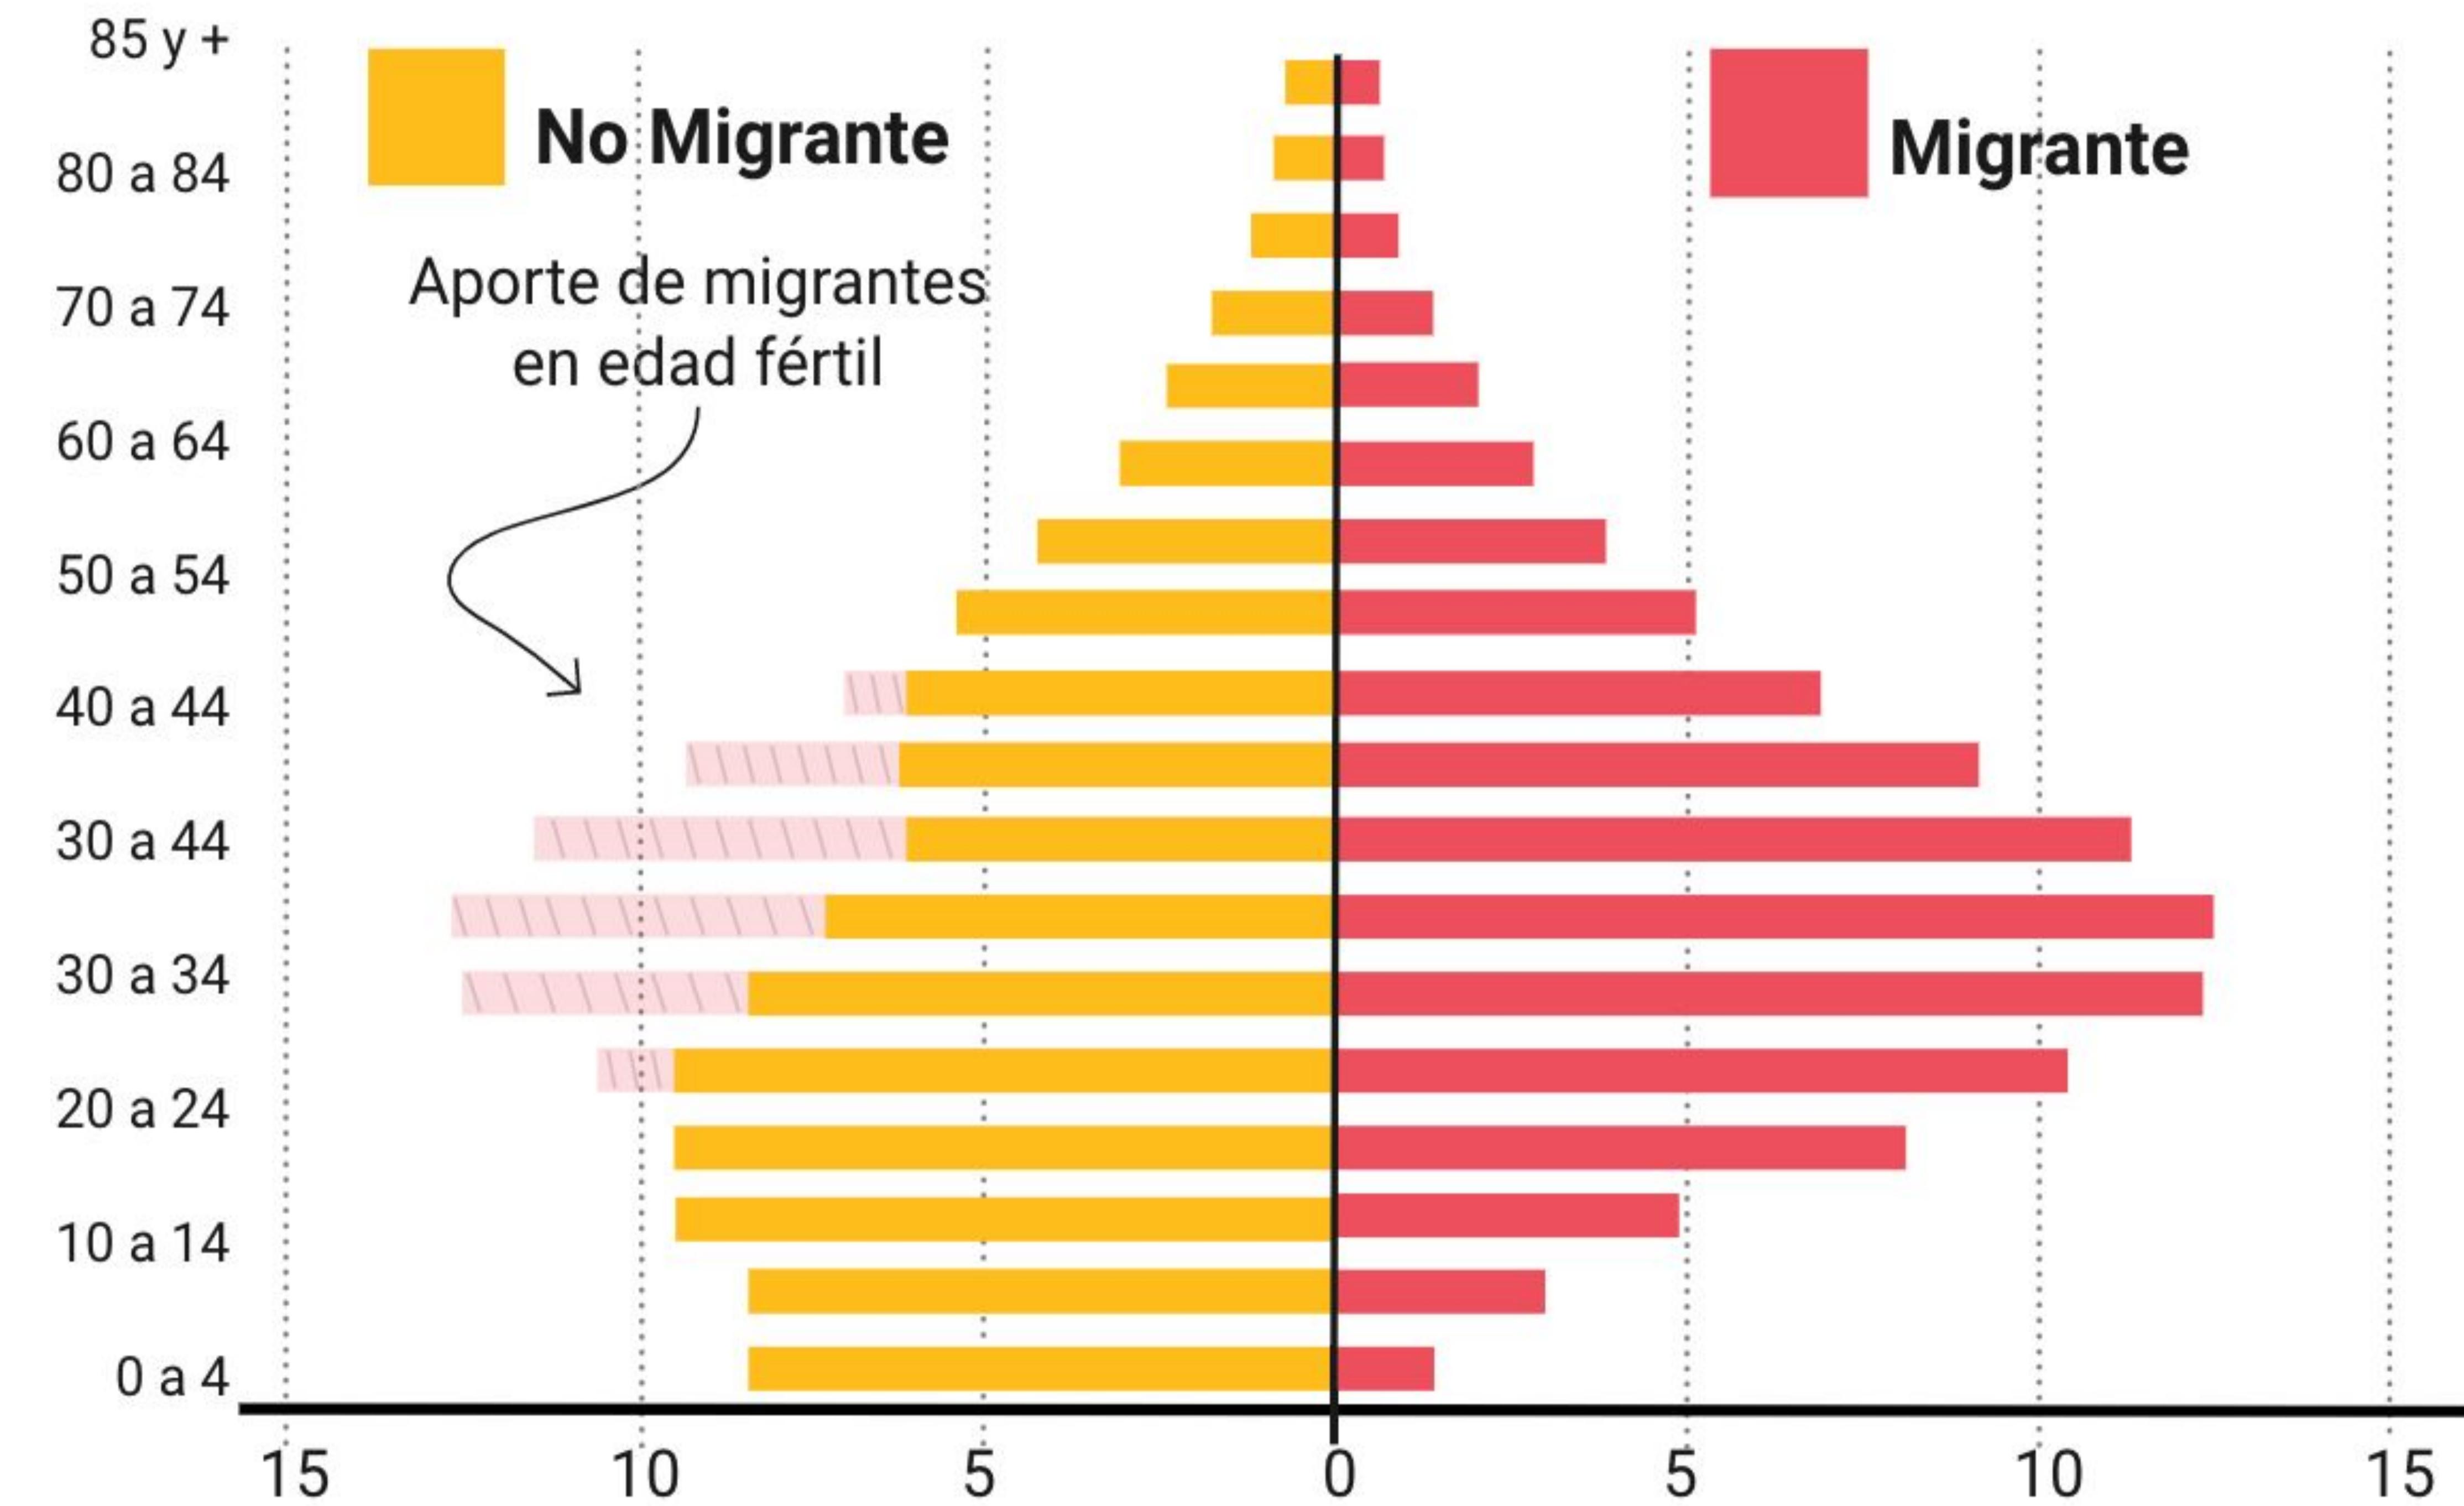

- A shift in narrative is needed: highlighting migrants' contributions to development
- It is necessary to strengthen the debate on public policies for inclusion and protection of rights.

Migration slows aging

- Migrant population slows down population aging processes
- Migration contributes to filling deficits in economically active population.
- Birth rates of migrant women tend to be higher than national rates, which revitalizes the birth rate.

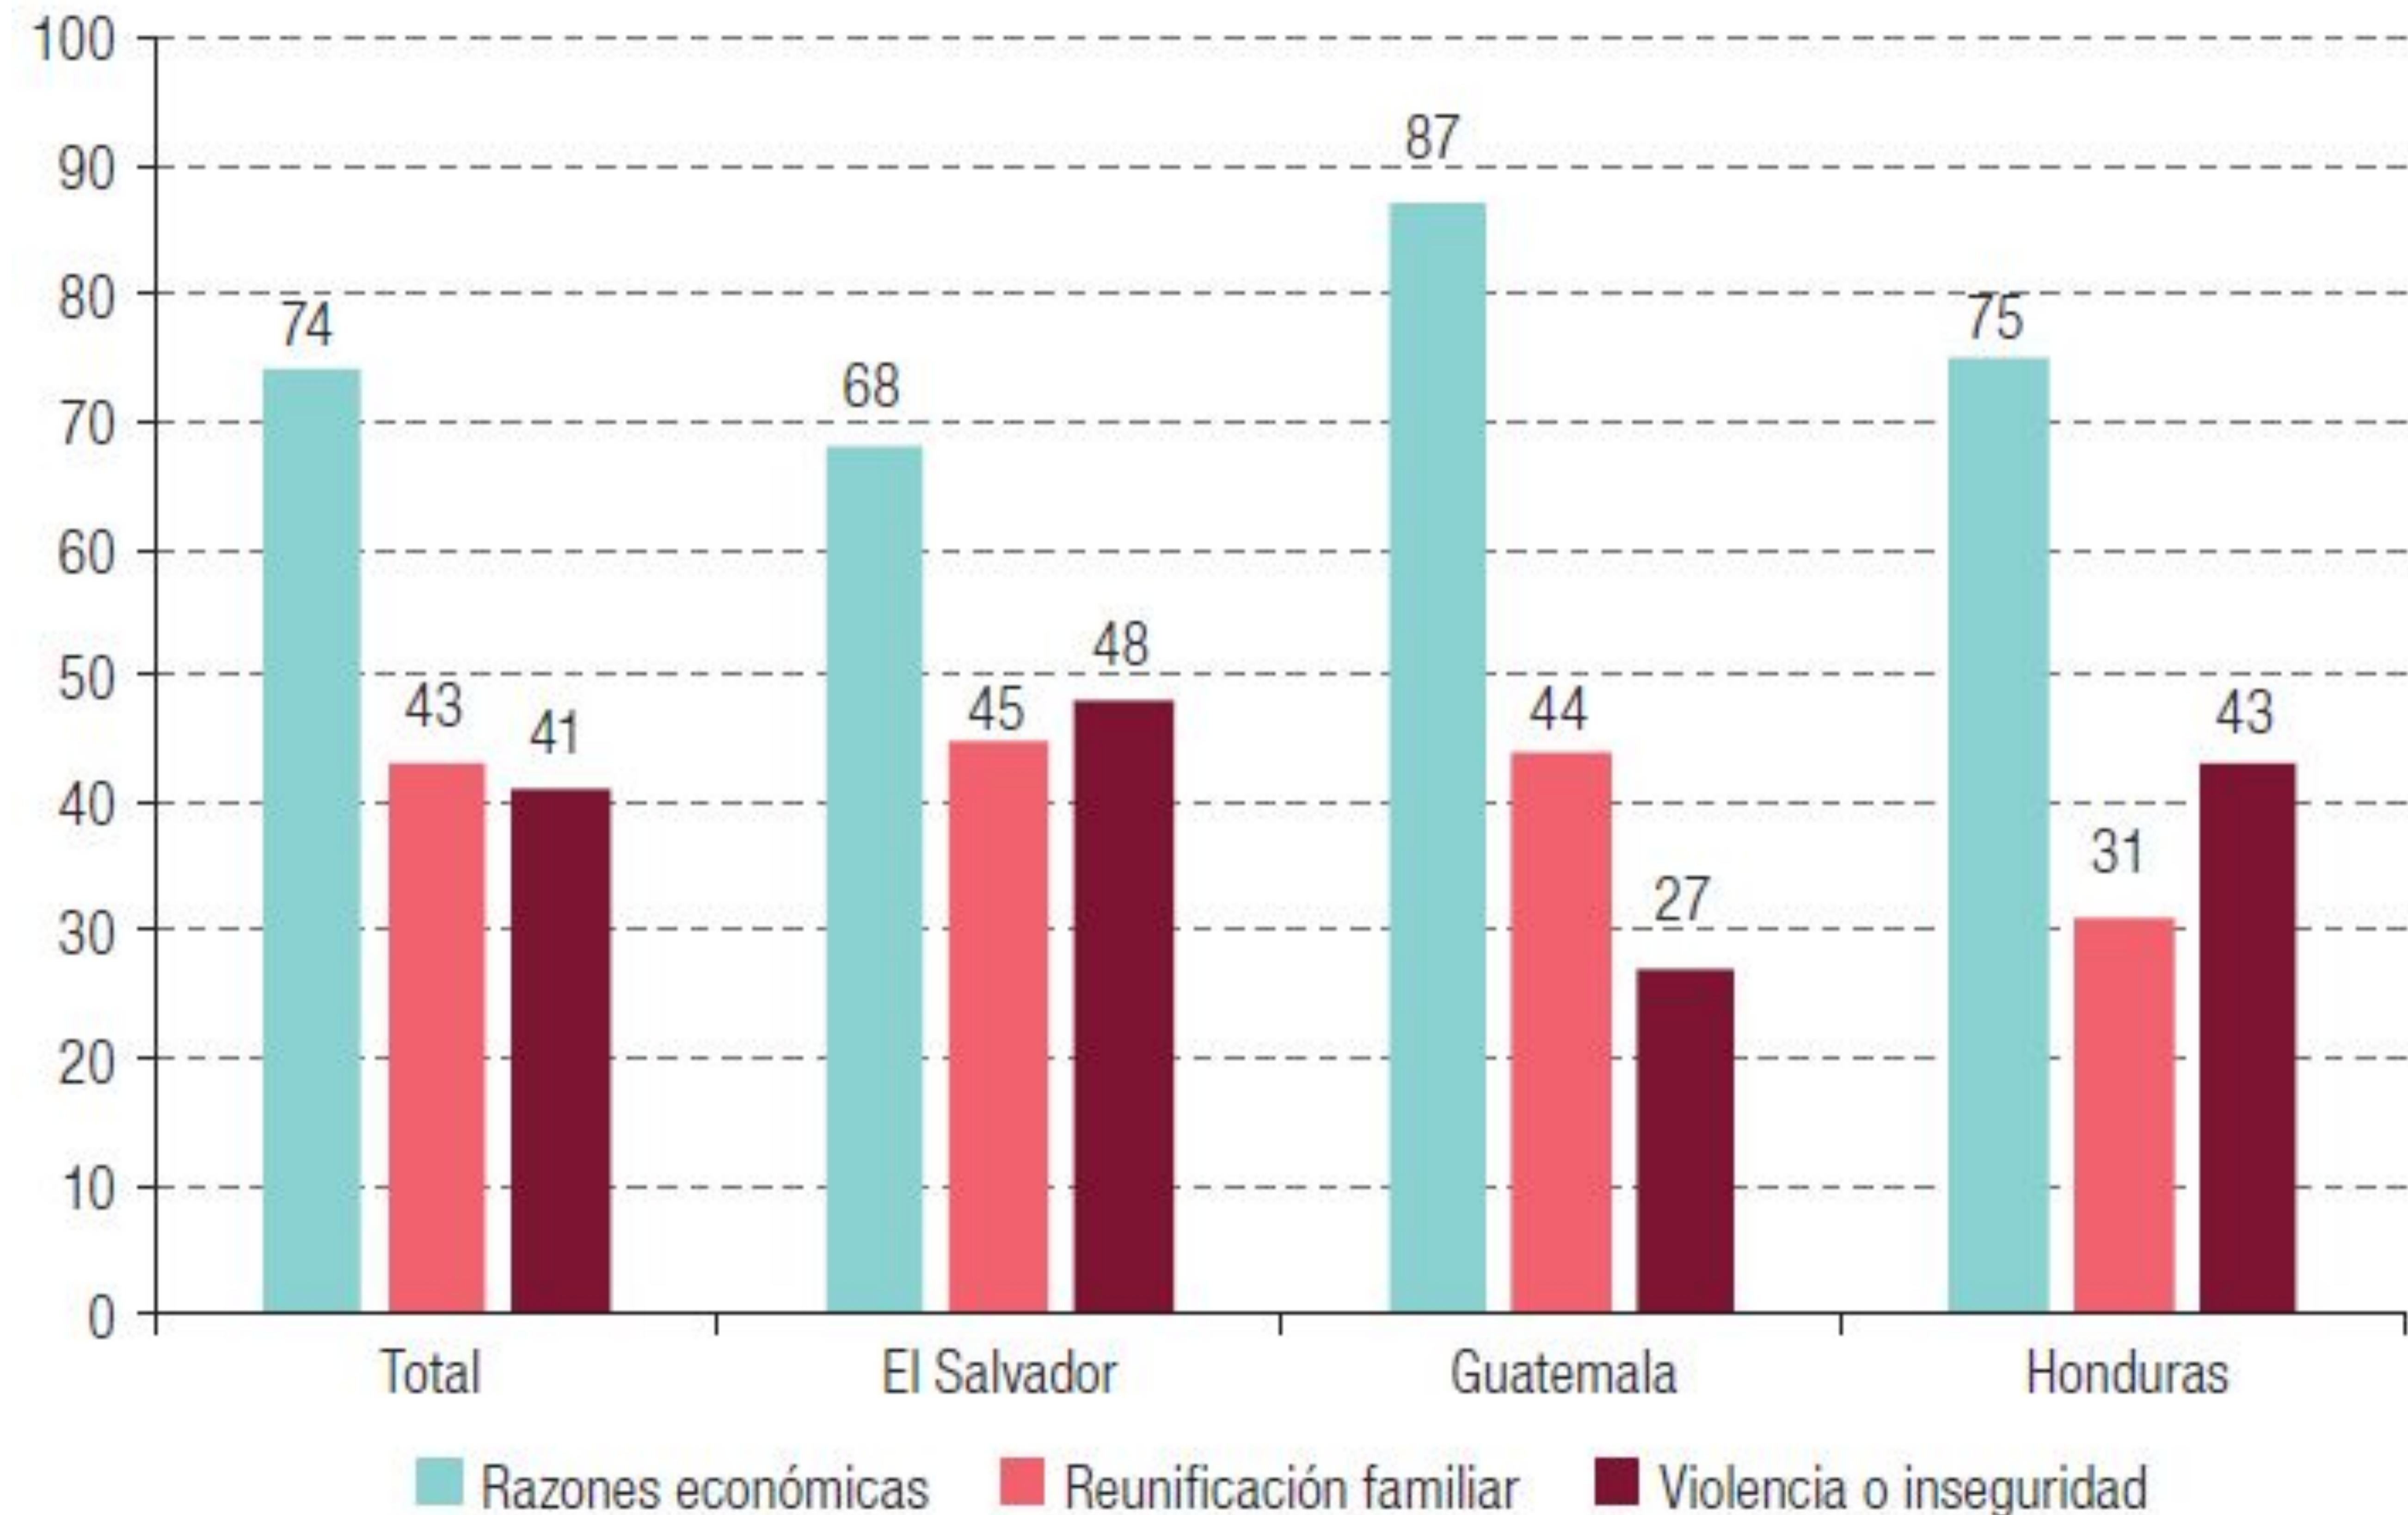

Costa Rica: Proporción de población no migrante y migrante por grupo de edad, 2011

Fuente: CEPAL, sobre la base de INEC, Censo Nacional de Población 2011.

Migration has a strong labor component

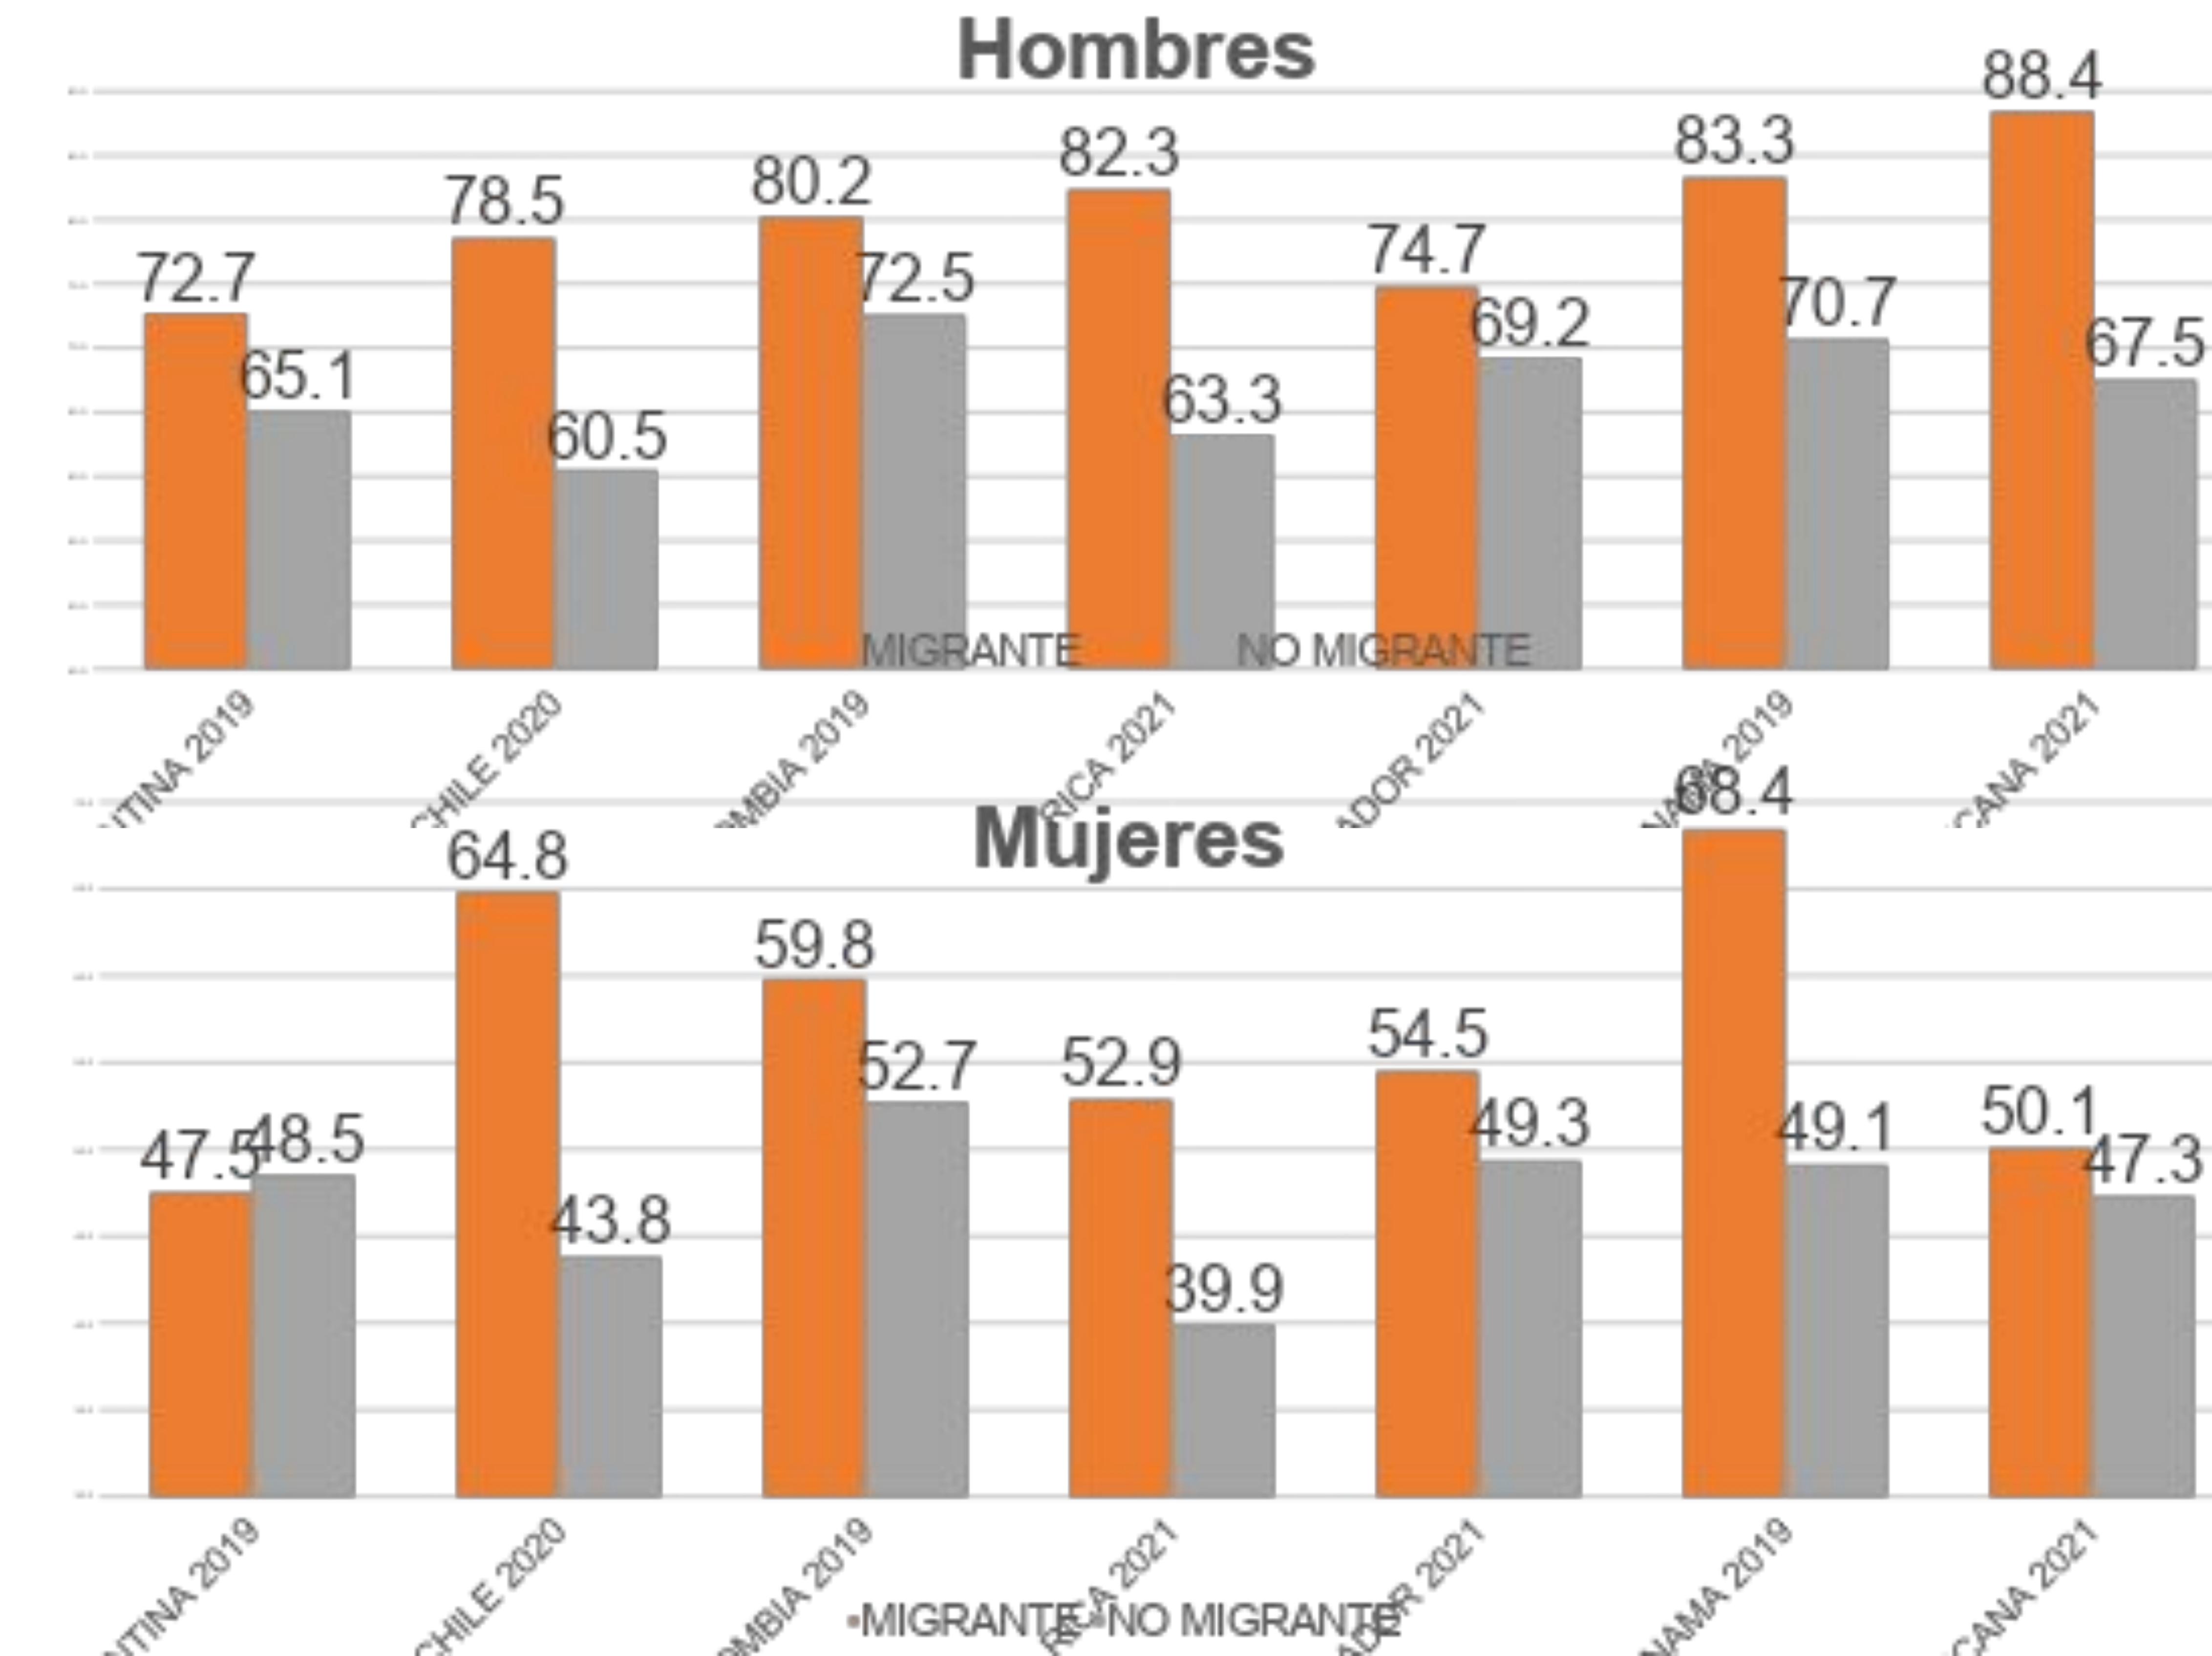

El Salvador, Guatemala, and Honduras: main reasons reported for migrating to the United States between 2007 and 2017 (in percentages).

The labor aspect of migration is explained by the development differential in the countries, which drives (often increasingly forced by circumstances) people to seek better opportunities.

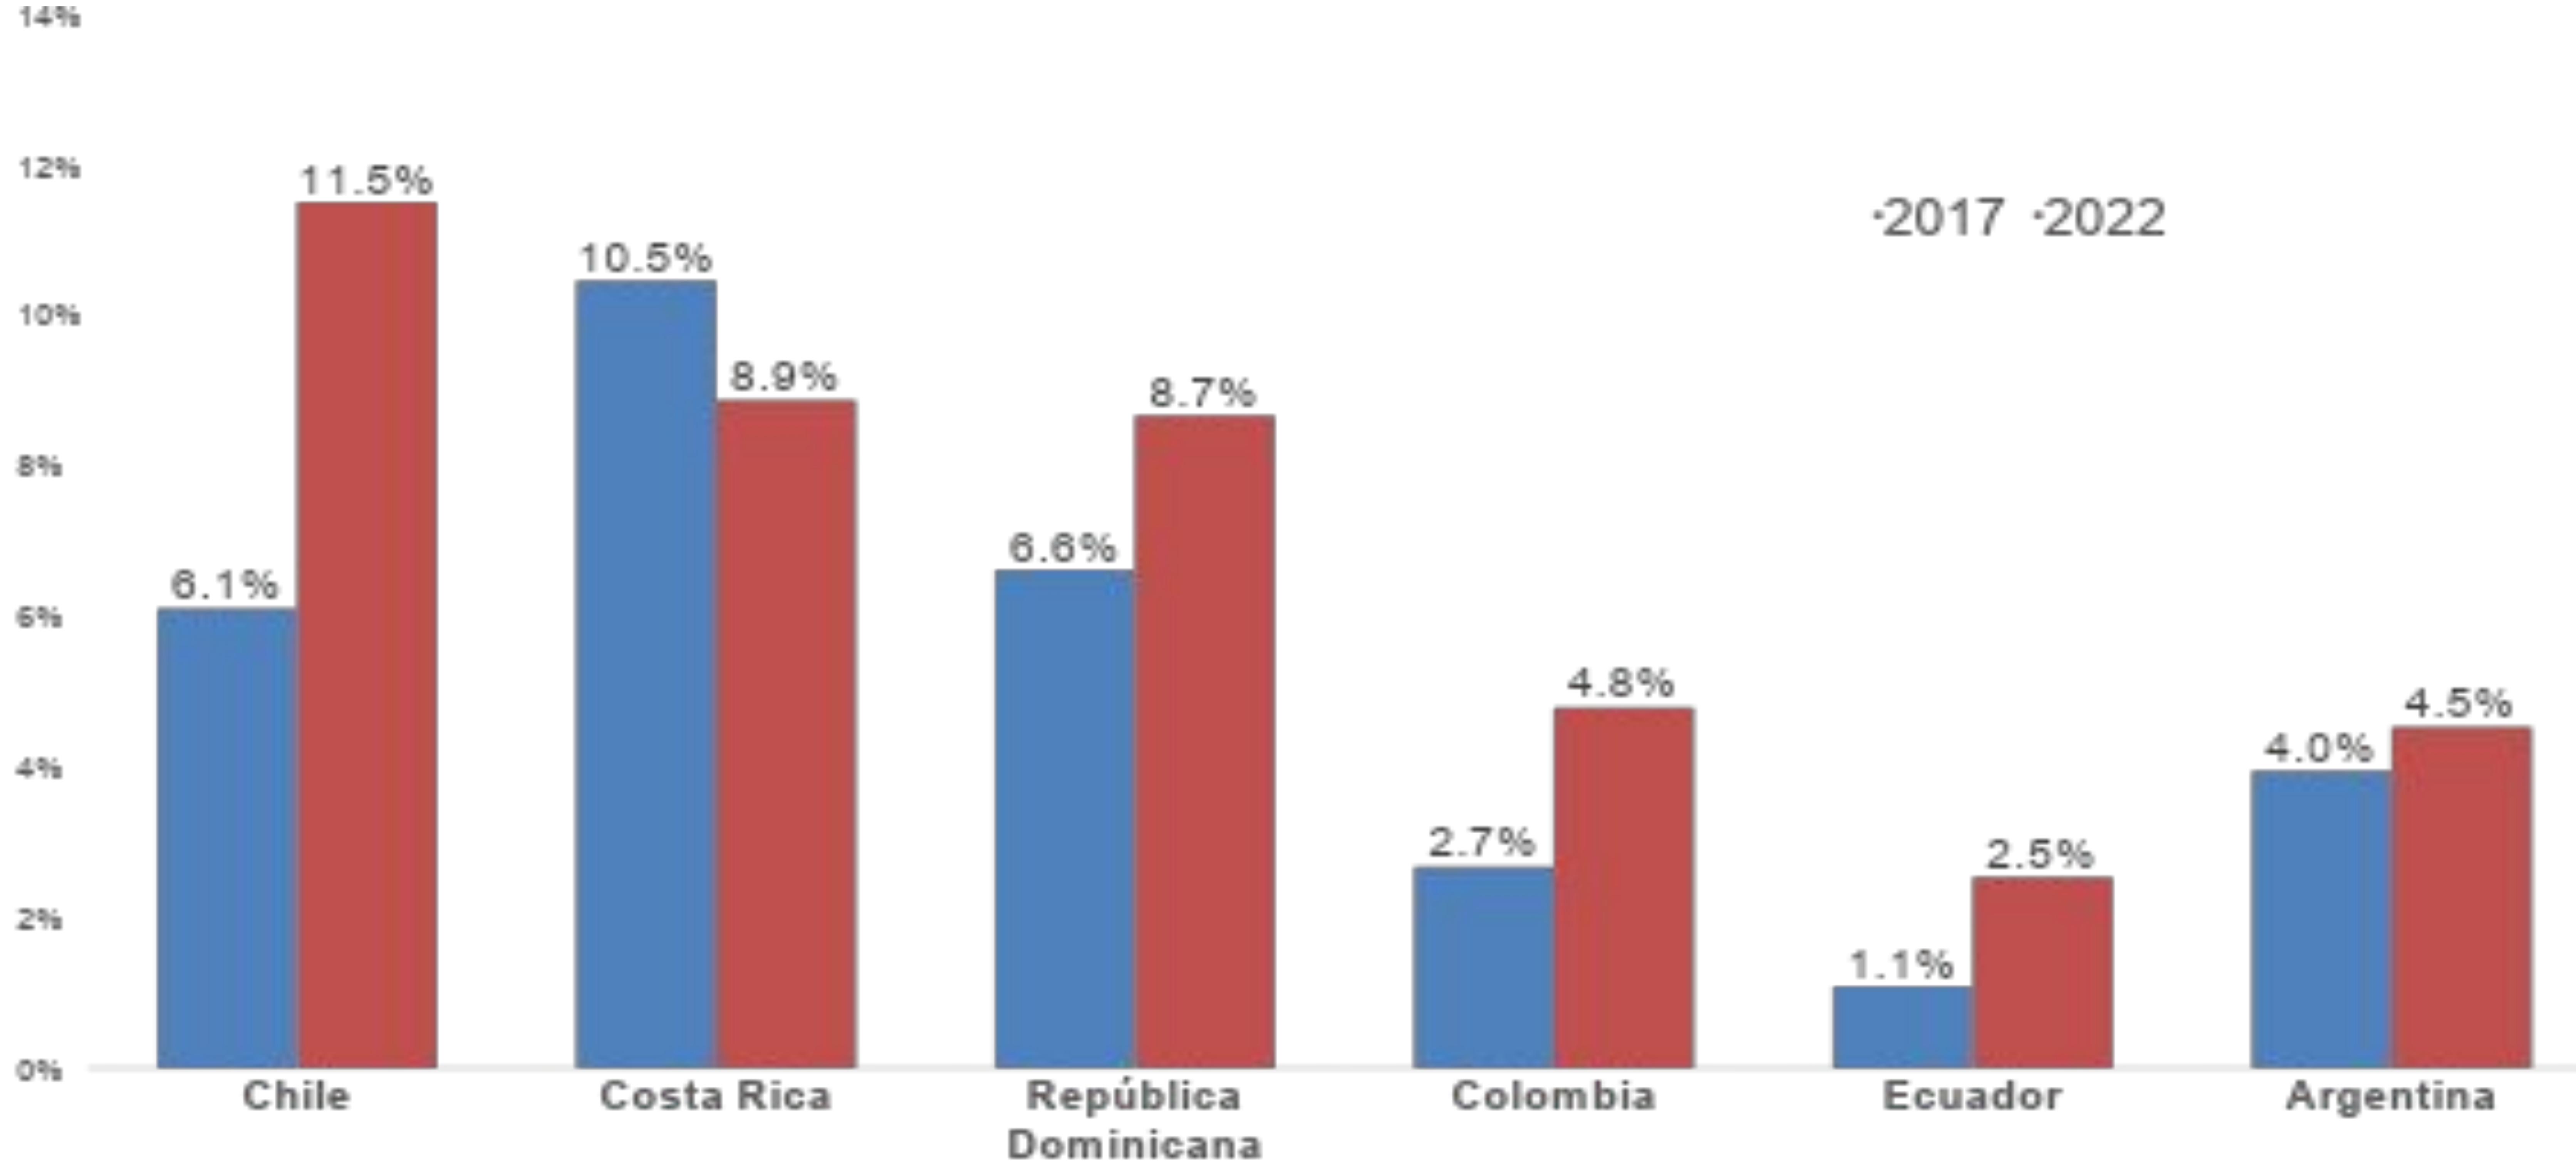

Migrants have higher labour participation rates compared to non-migrants

Latin America (7 countries): Labour force participation rate of the population aged 10 and over, by migration status and sex, latest available data (percentages)

Migrants contribute to the GDP

Latin America (6 countries): Gross Domestic Product generated by migrants, 2017 and 2022
(in percentages)

Fuente: Comisión Económica de América Latina y el Caribe (CEPAL), sobre la base de: Chile, Encuesta CASEN, 2009 a 2020, y Nueva Encuesta Nacional de Empleo, 2020 a 2022; Costa Rica, Encuesta Nacional de Hogares, 2011a 2022; República Dominicana, IX Censo Nacional de Población y Vivienda 2010, y Encuesta Nacional de Hogares, 2015, 2017 y 2022; Argentina, Encuesta Permanente de Hogares, 2010 a 2022; Colombia, Encuesta Nacional de Calidad de Vida, 2010 y 2018 a 2022; Ecuador, Encuesta Nacional de Empleo, Desempleo y Subempleo (ENEMDU) 2015 a 2022; CEPALSTAT e información de cuentas nacionales del Banco Central de cada país. Dato de Colombia corresponde a 2018.

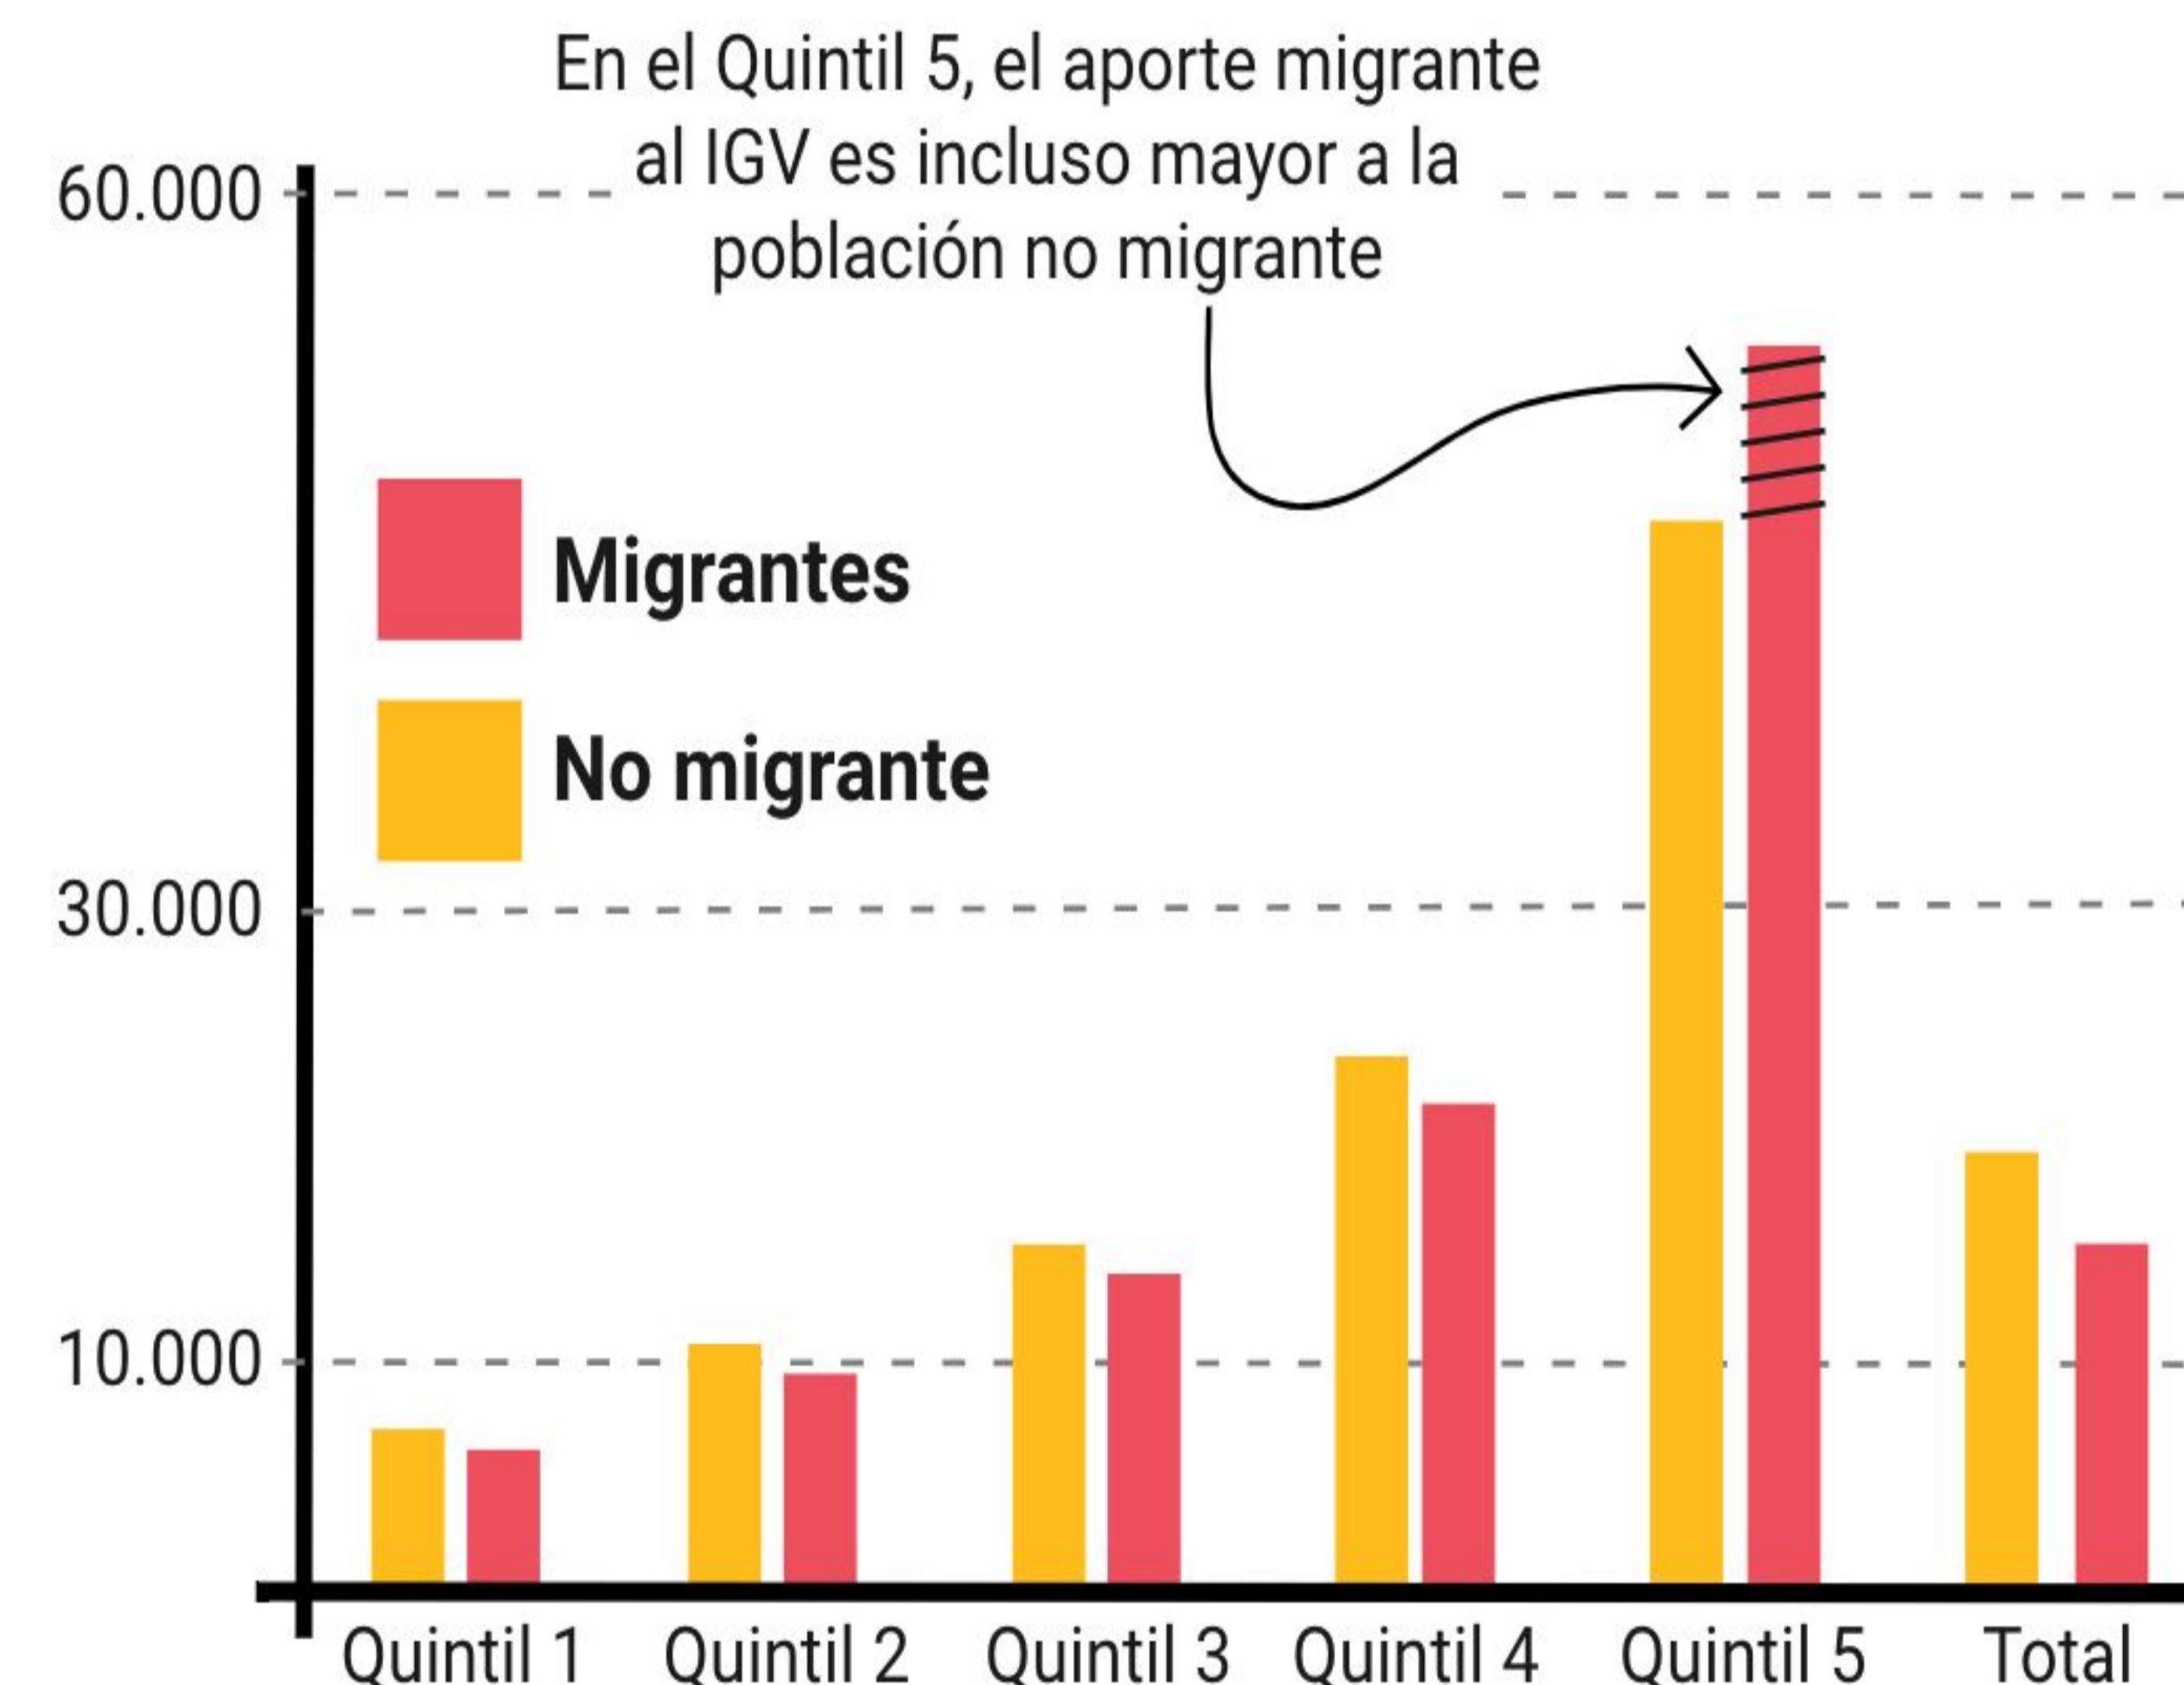

Tax contribution: Costa Rica and Peru

When migrants have access to taxable consumer goods, **they generate a tax contribution.**

As in the case of **Costa Rica and Peru**, where the positive impact on the IGV (General Sales Tax) is evident

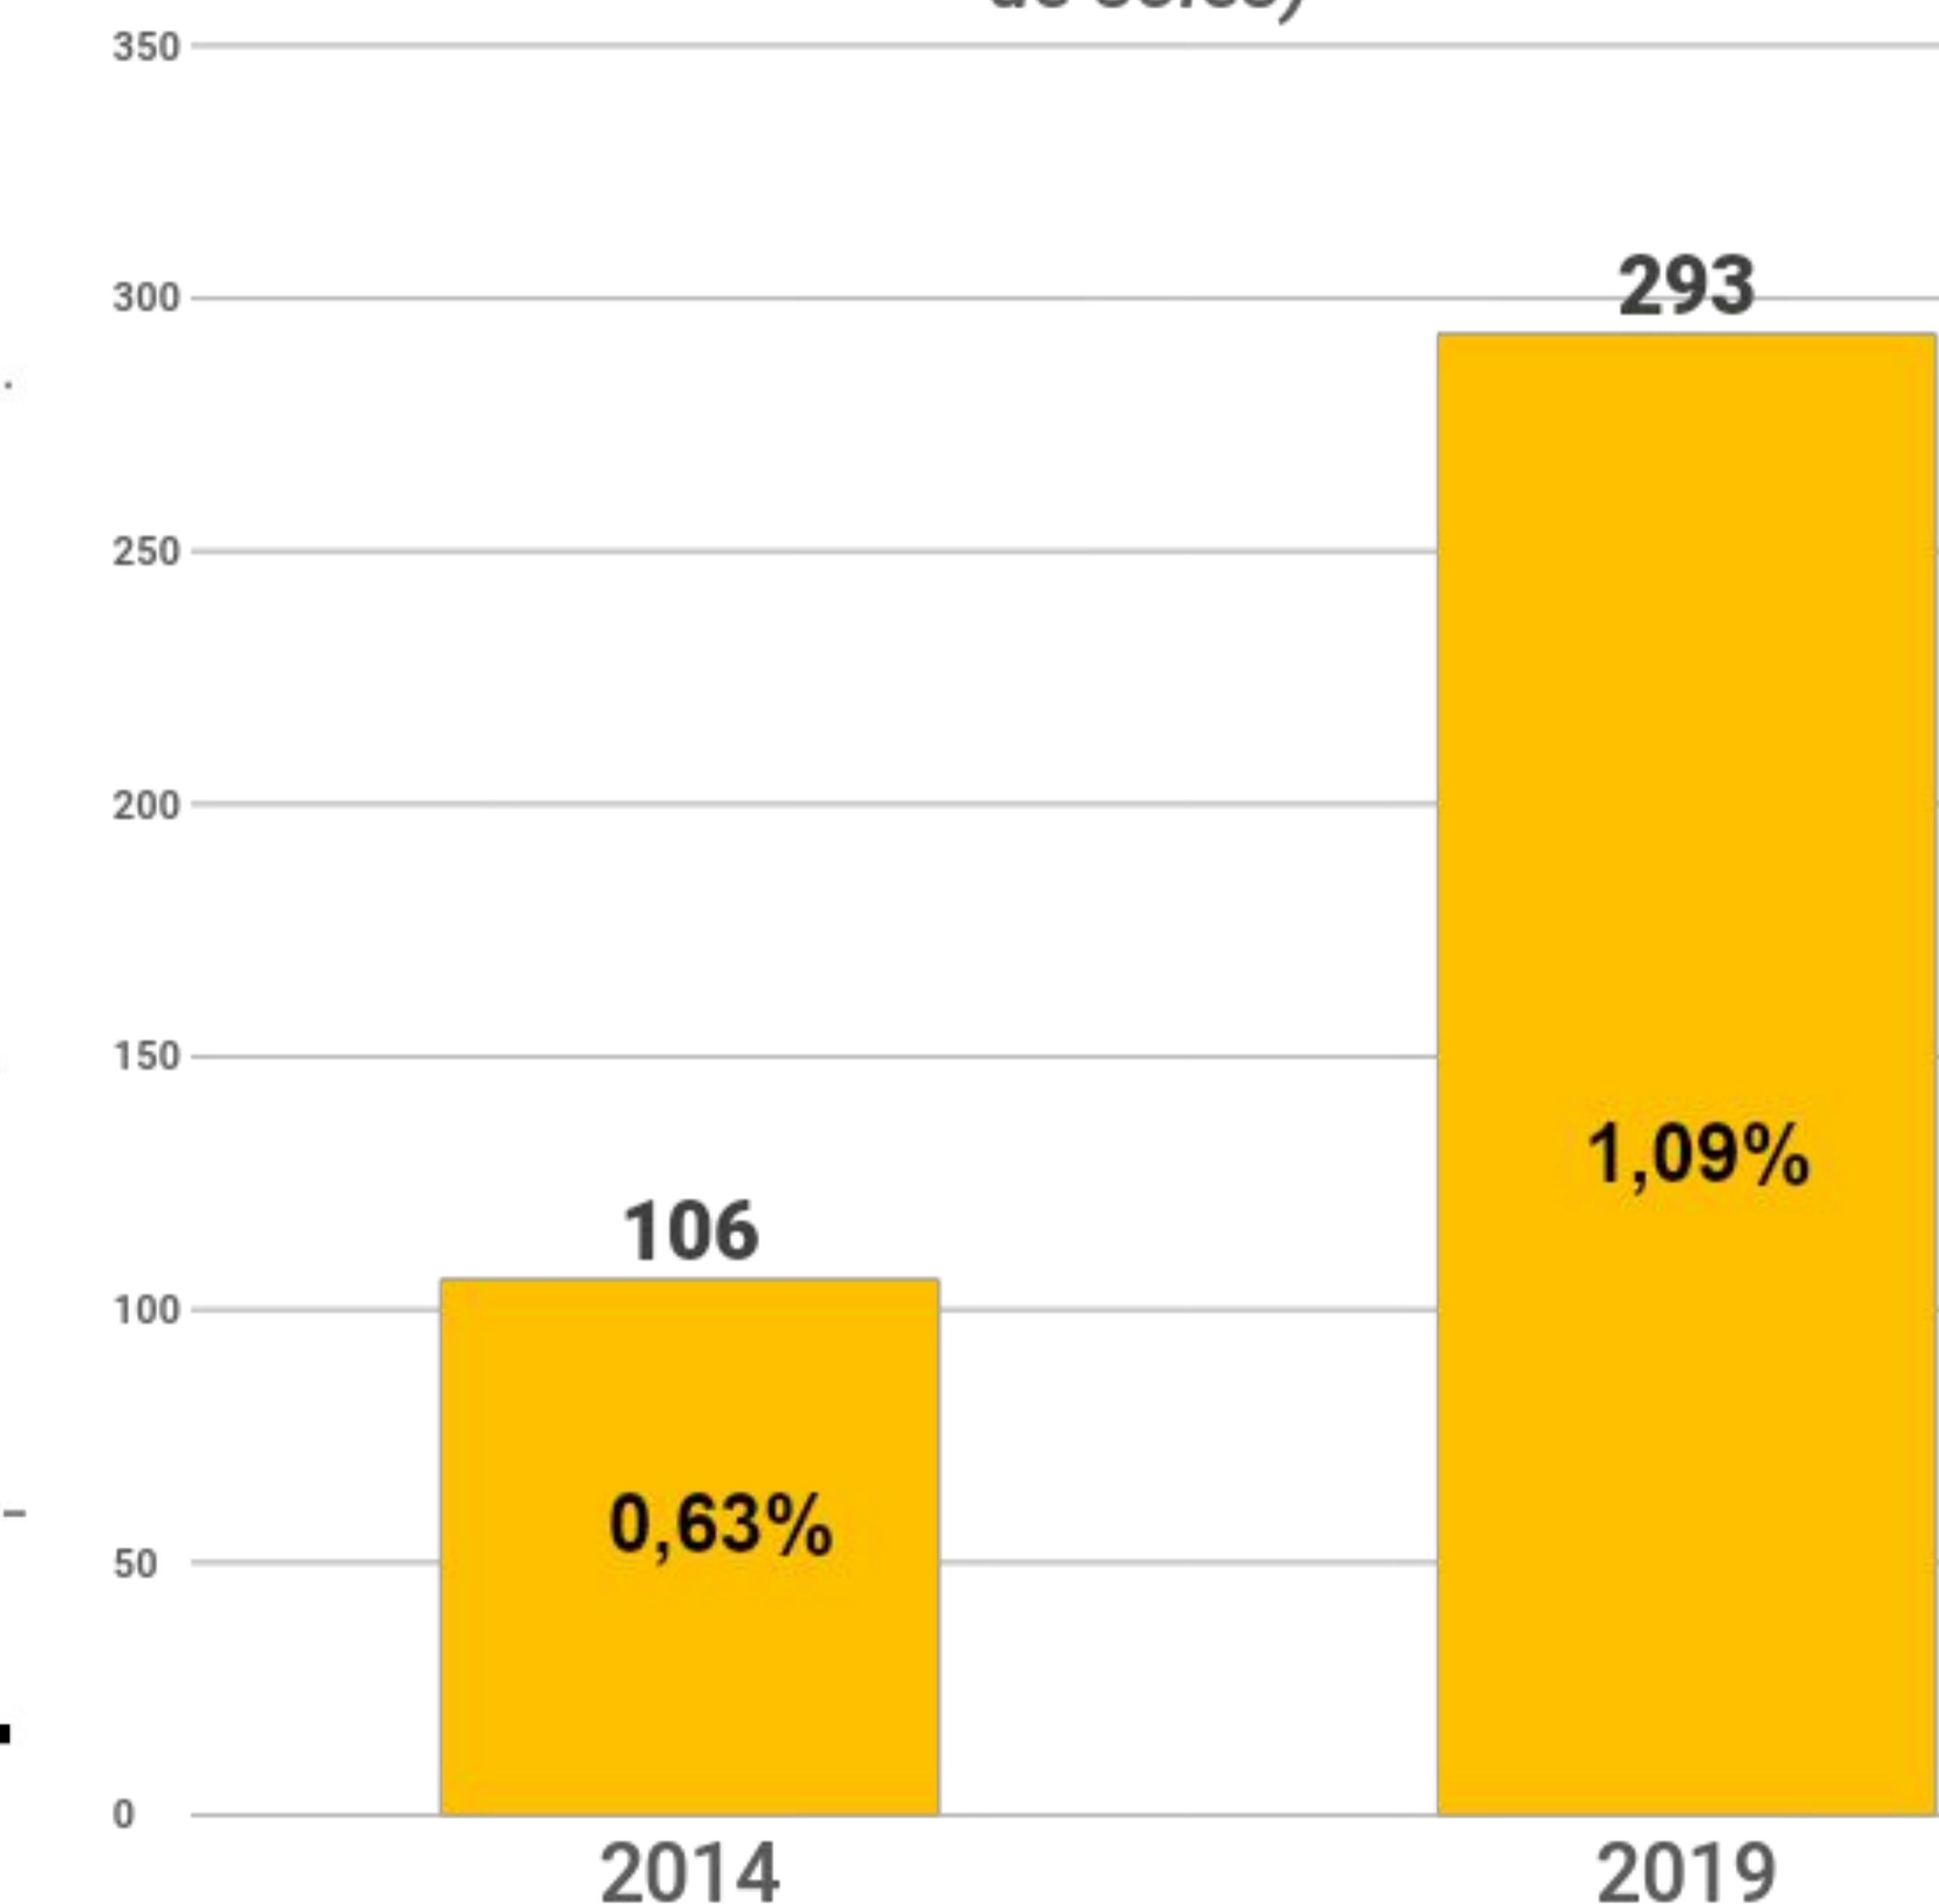

In addition, those who are **regularized** contribute to **income tax** and **social security**

Costa Rica : Monto mensual en colones pagado en IGV por quintil de ingreso del hogar y condición de migración, 2018 (En colones)

Fuente: CEPAL, sobre la base de INEC, ENIGH 2018.

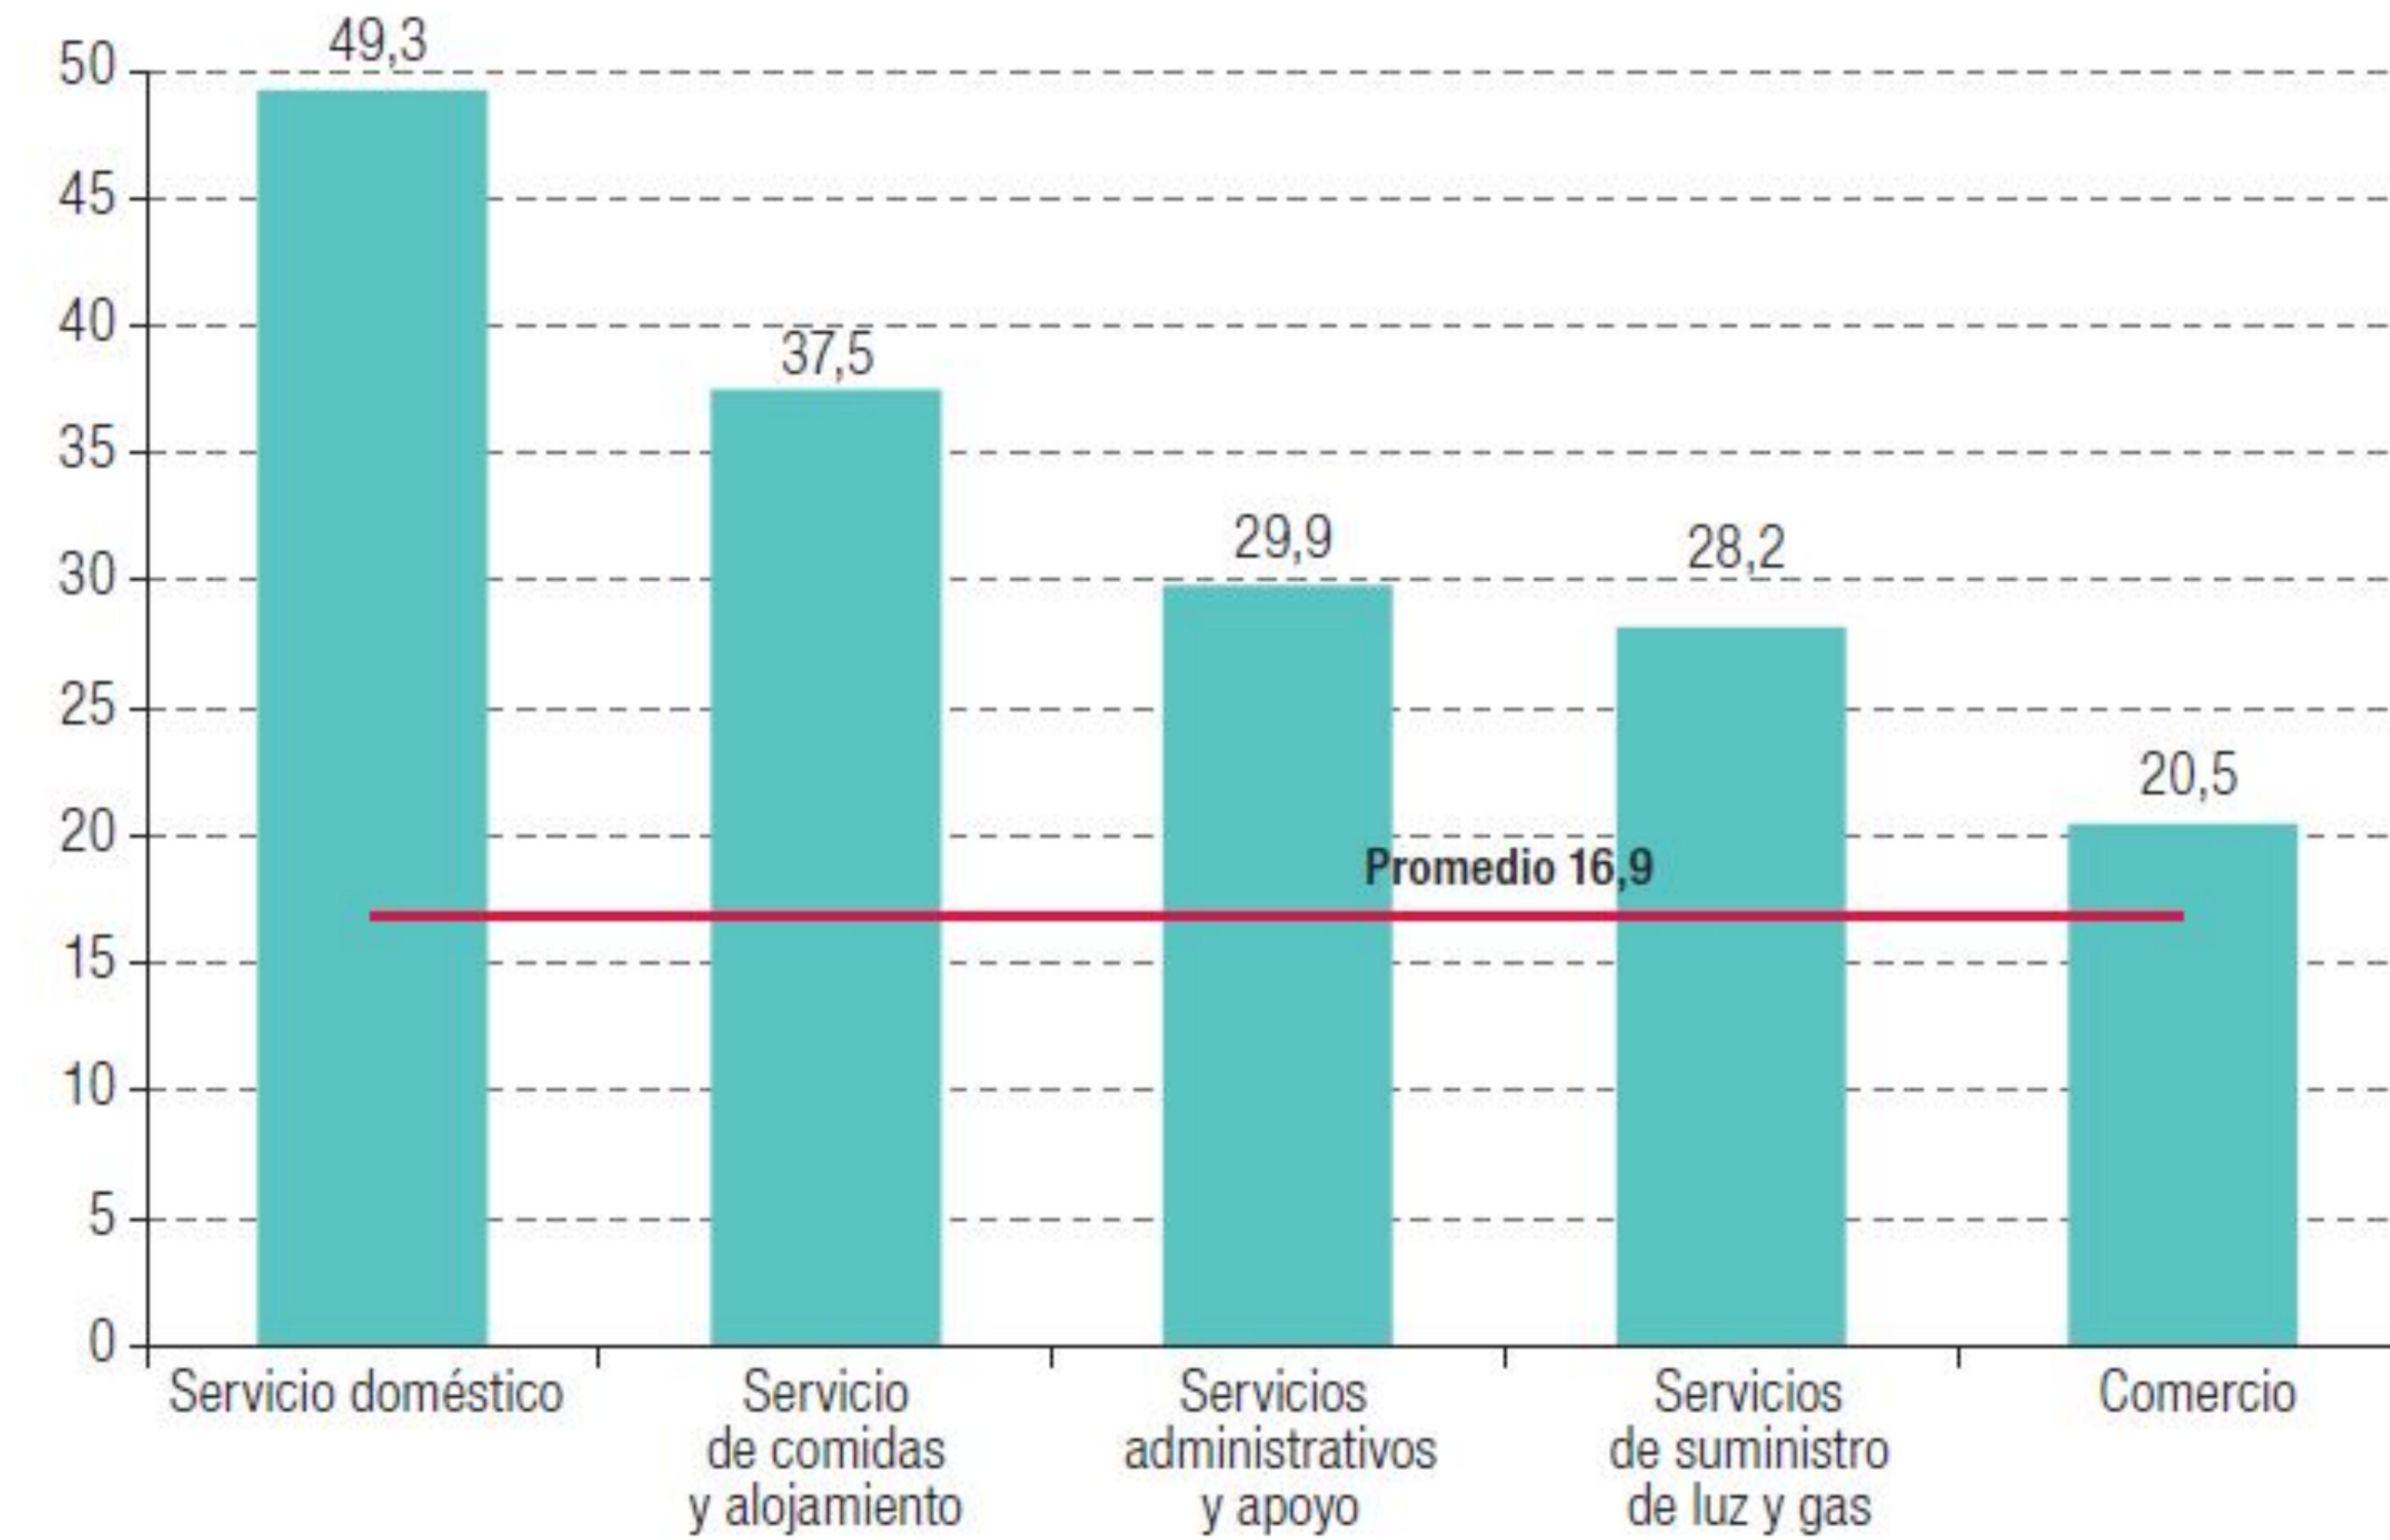

Perú: Contribución de la población migrante a la recaudación del IGV, 2014-2019 (Millones de soles)

Fuente: CEPAL, sobre la base de la ENAHO.

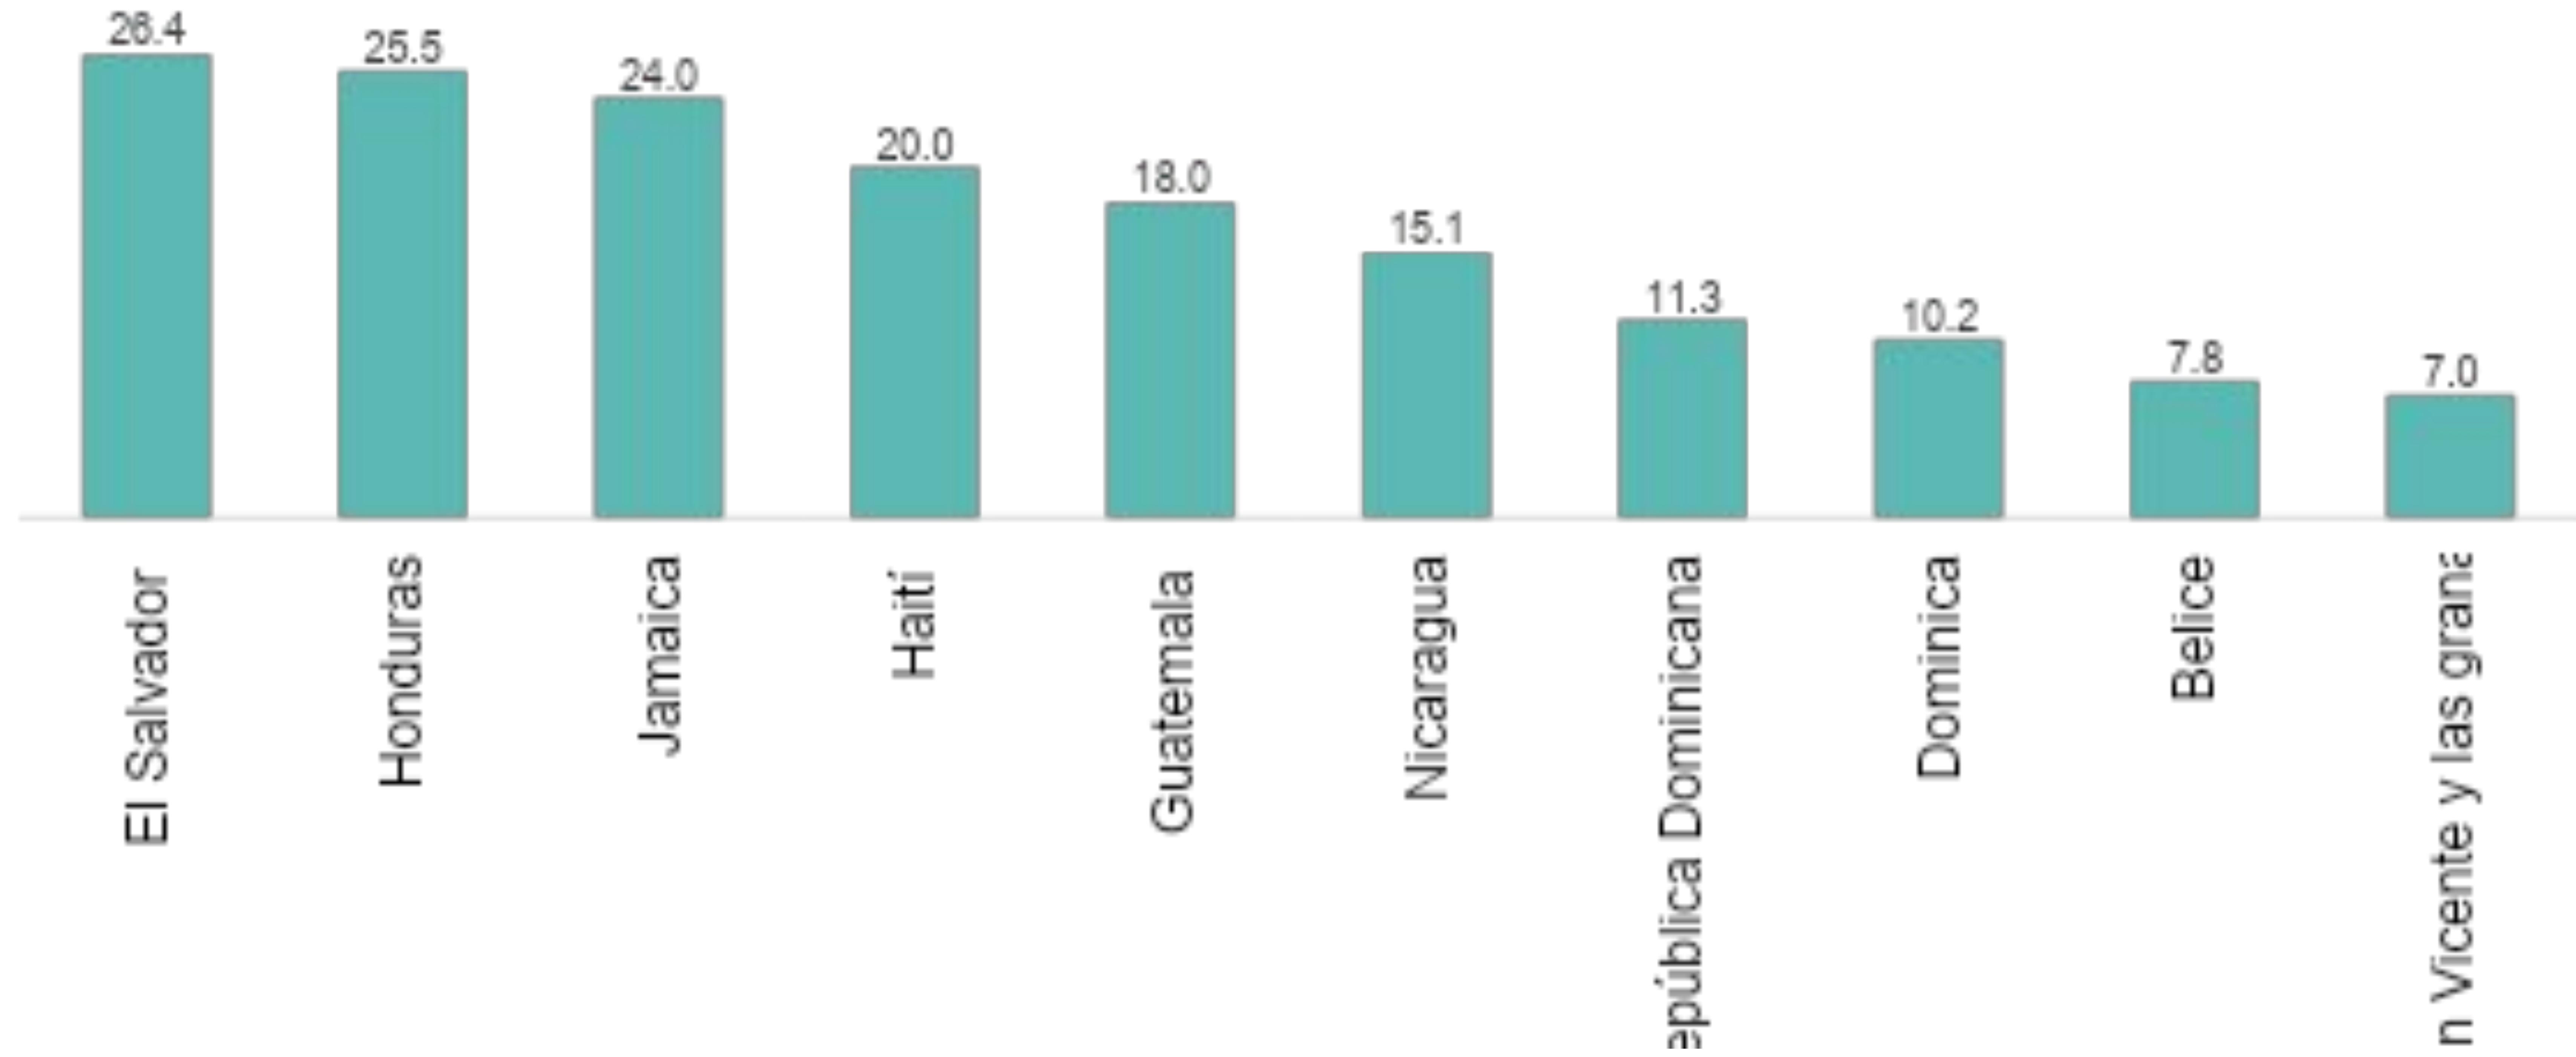

Migrants on the front lines of essential occupations in response to the COVID-19 pandemic

Chile (Santiago Metropolitan Area): occupations with the highest share of migrant workers, June-August 2020 quarter (in percentages)

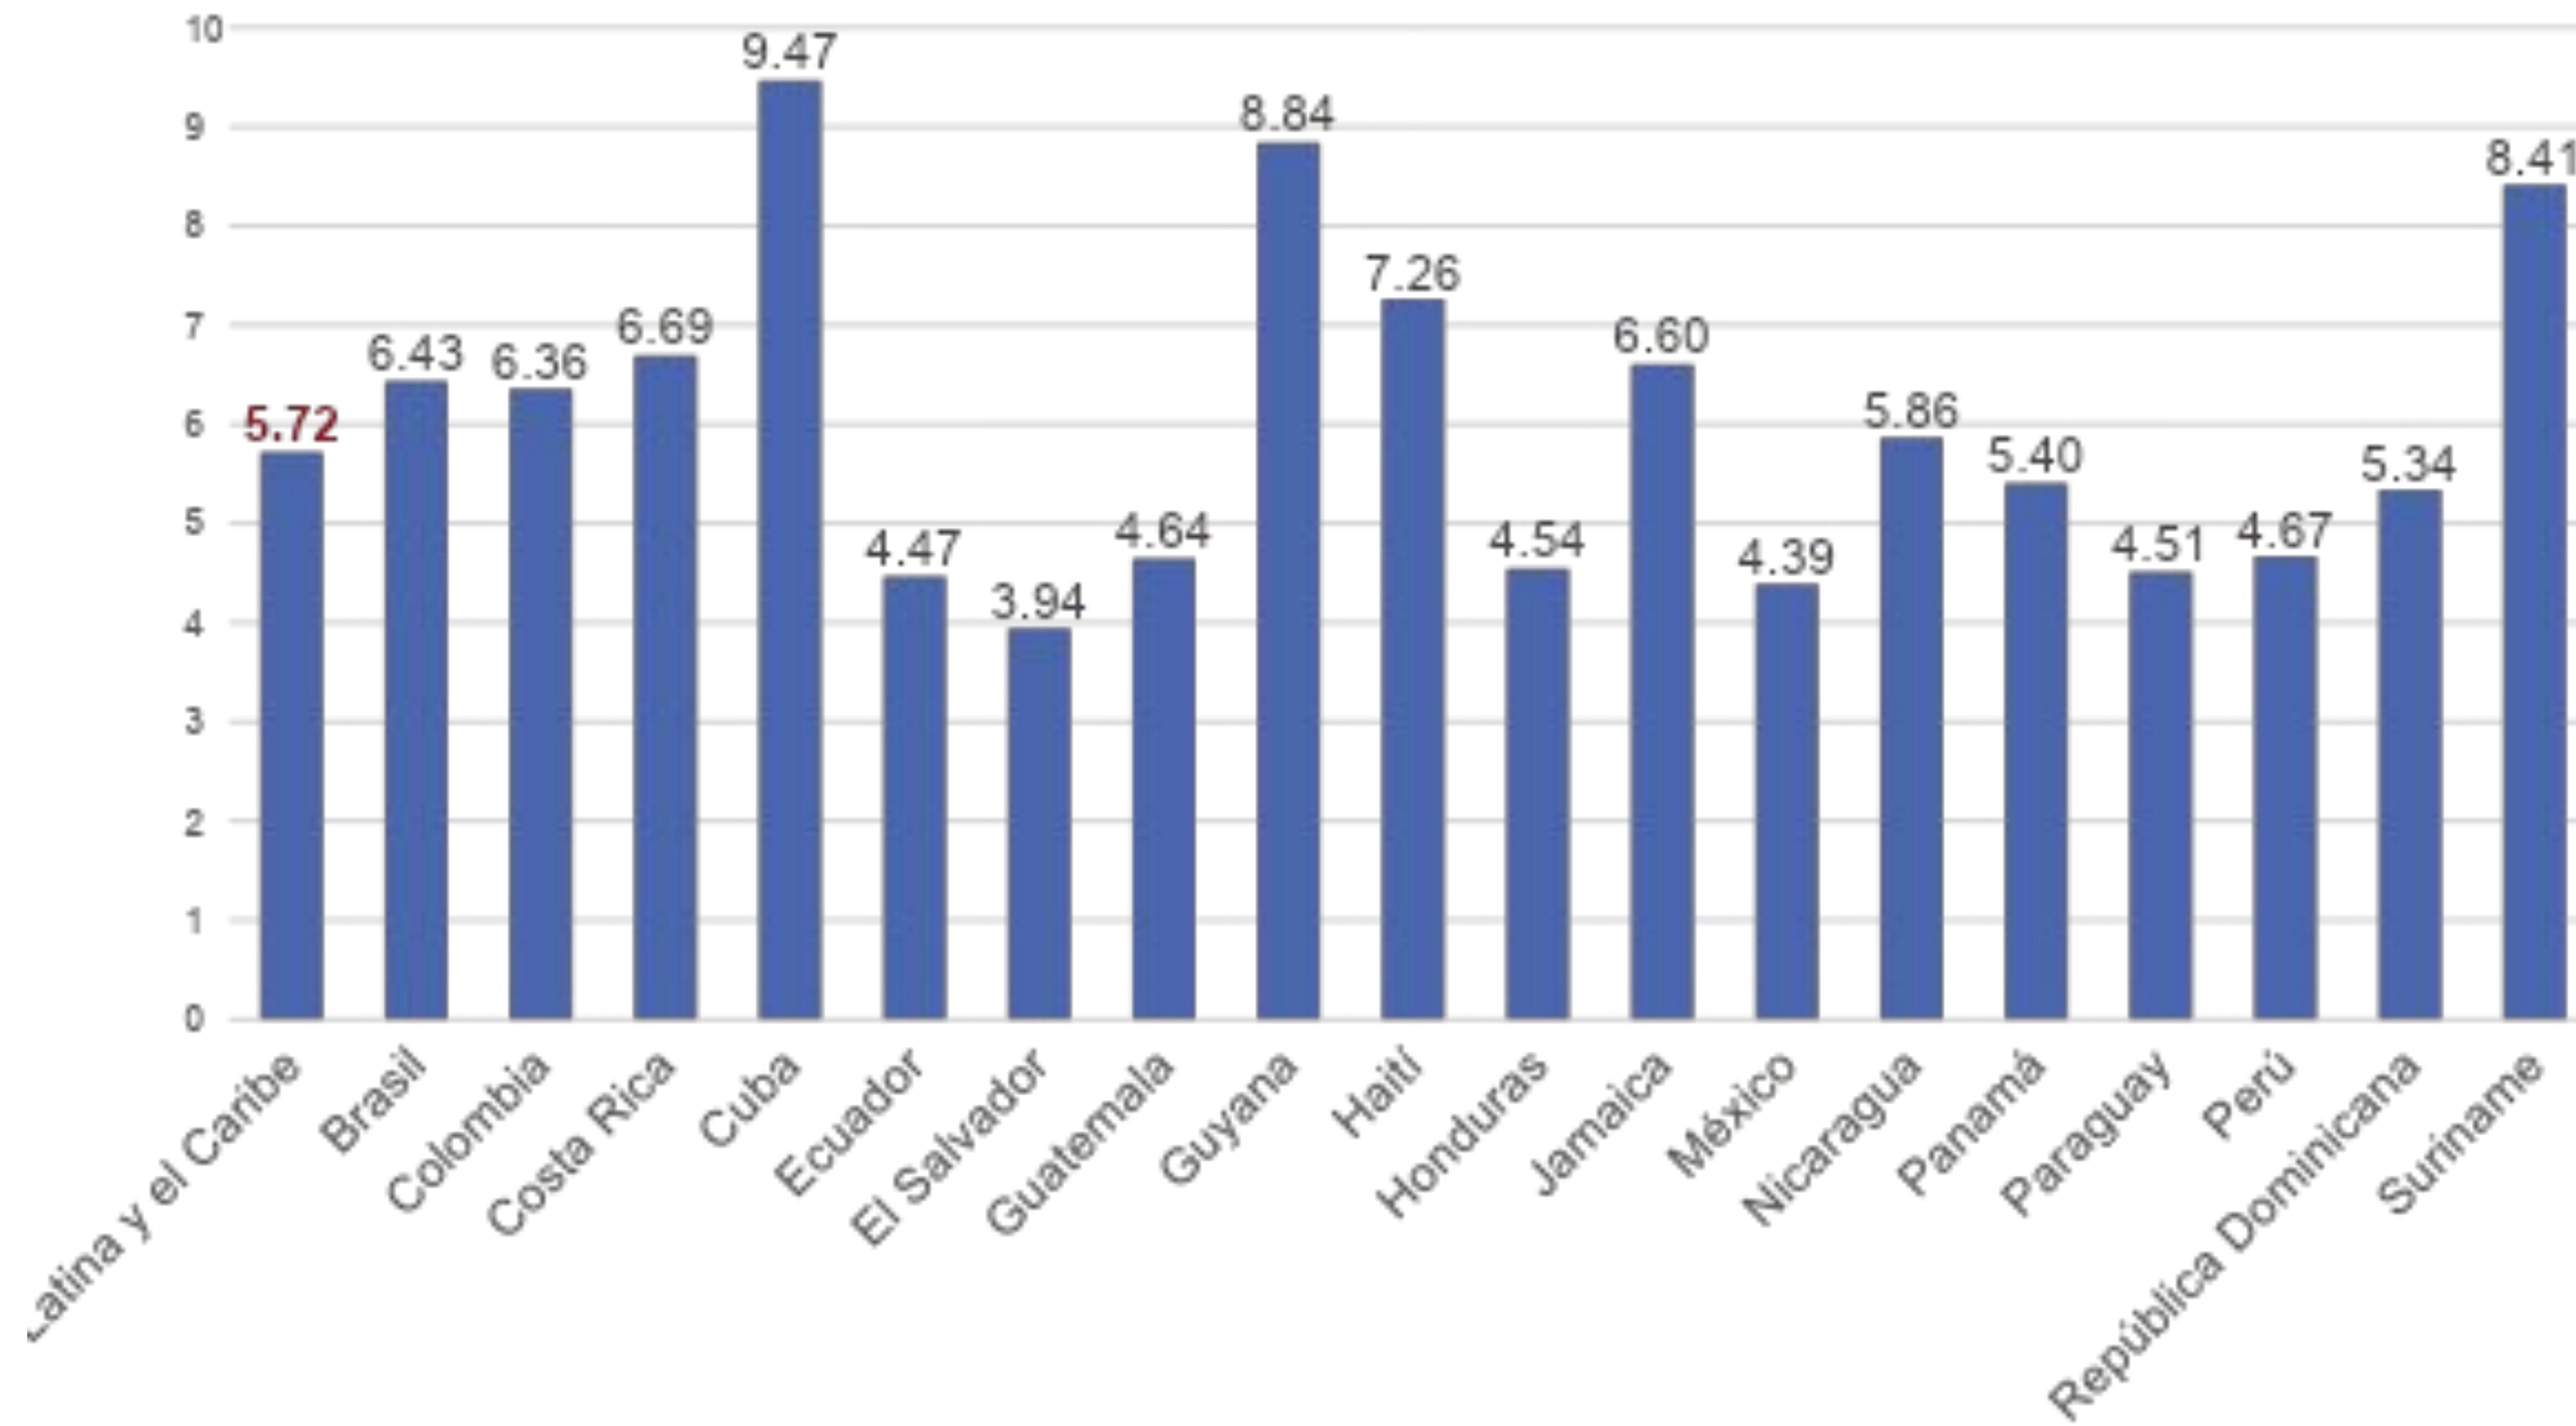

Migrants contribute significantly to their countries of origin through remittances.

**Latin America and the Caribbean (10 countries):
Remittances, 2021 (as a percentage of GDP)**

Average cost of sending remittances for sending US\$200 to a receiving country as a proportion of the amount remitted, 2021 (in percentages)

Necessary elements to maximize the benefits of migration

- Promoting regular migration
- Promote policy coordination between countries of origin and destination.
- Implement bilateral and multilateral agreements on migrant workforce between countries of origin and destination
- Reduce remittance transfer costs and create remittance-financed social investment programs
- Validation of skills (certification of competencies) and qualifications of migrant workers (recognition of diplomas)
- Create programs geared toward returning migrants. Facilitate reintegration, knowledge transfer and entrepreneurial activities.

Internal displacements in the Americas

Desplazamientos internos (movimientos)

2,8 m
durante 2023

6%
del total
mundial

637.000
por conflicto y violencia

2,1 m
por desastres

Países con mayor el número de desplazamientos internos

Brasil
16.000 | 745.000

Colombia
293.000 | 351.000

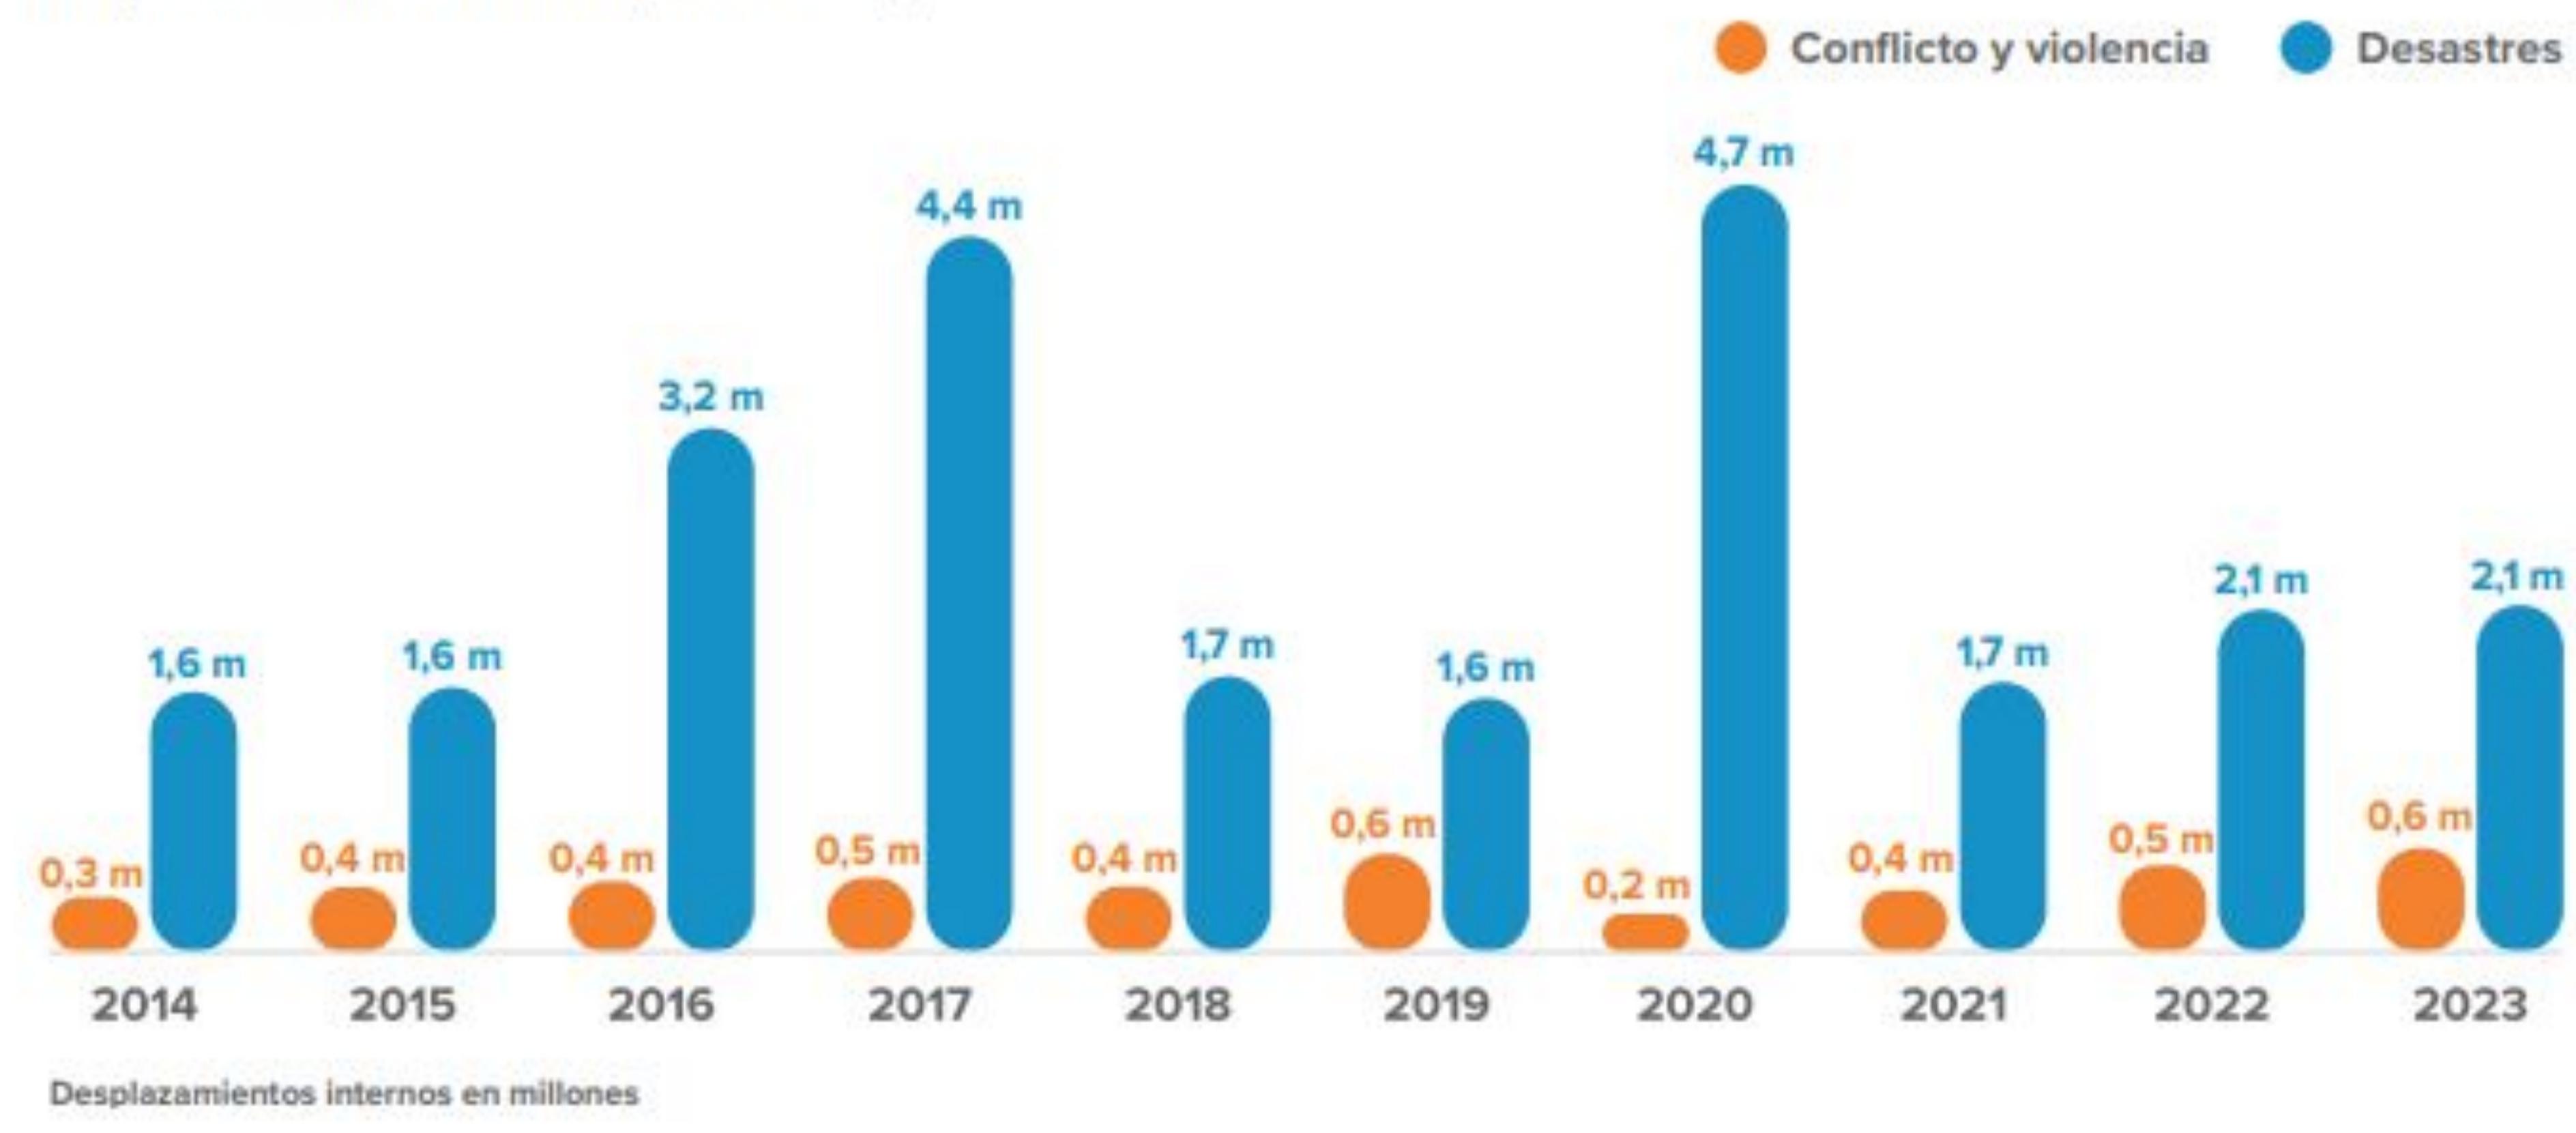

Haití
245.000 | 9.800

México
11.000 | 196.000

Estados Unidos
202.000

Desplazamientos internos (2014-2023)

Flooding and storms caused the displacement of 1.5 million people, primarily in South America.

Colombia registered 351,000 displacements due to disasters, an **increase of 25% from 2022** and the **highest rate in more than a decade**.

Canada went through the most destructive season of forest fires in 76 years, with 185,000 internally displaced persons, the highest number since 2008 and 43% of the global number of displacements due to forest fires.

Climate change and disasters are emerging as key factors in human mobility in Central American communities.

PROJECTIONS – MOBILITY DUE TO ENVIRONMENTAL REASONS, 2050

Projected hotspots that will have **high levels of internal migration and emigration due to climate, 2050**

High certainty of high levels of immigration due to climate

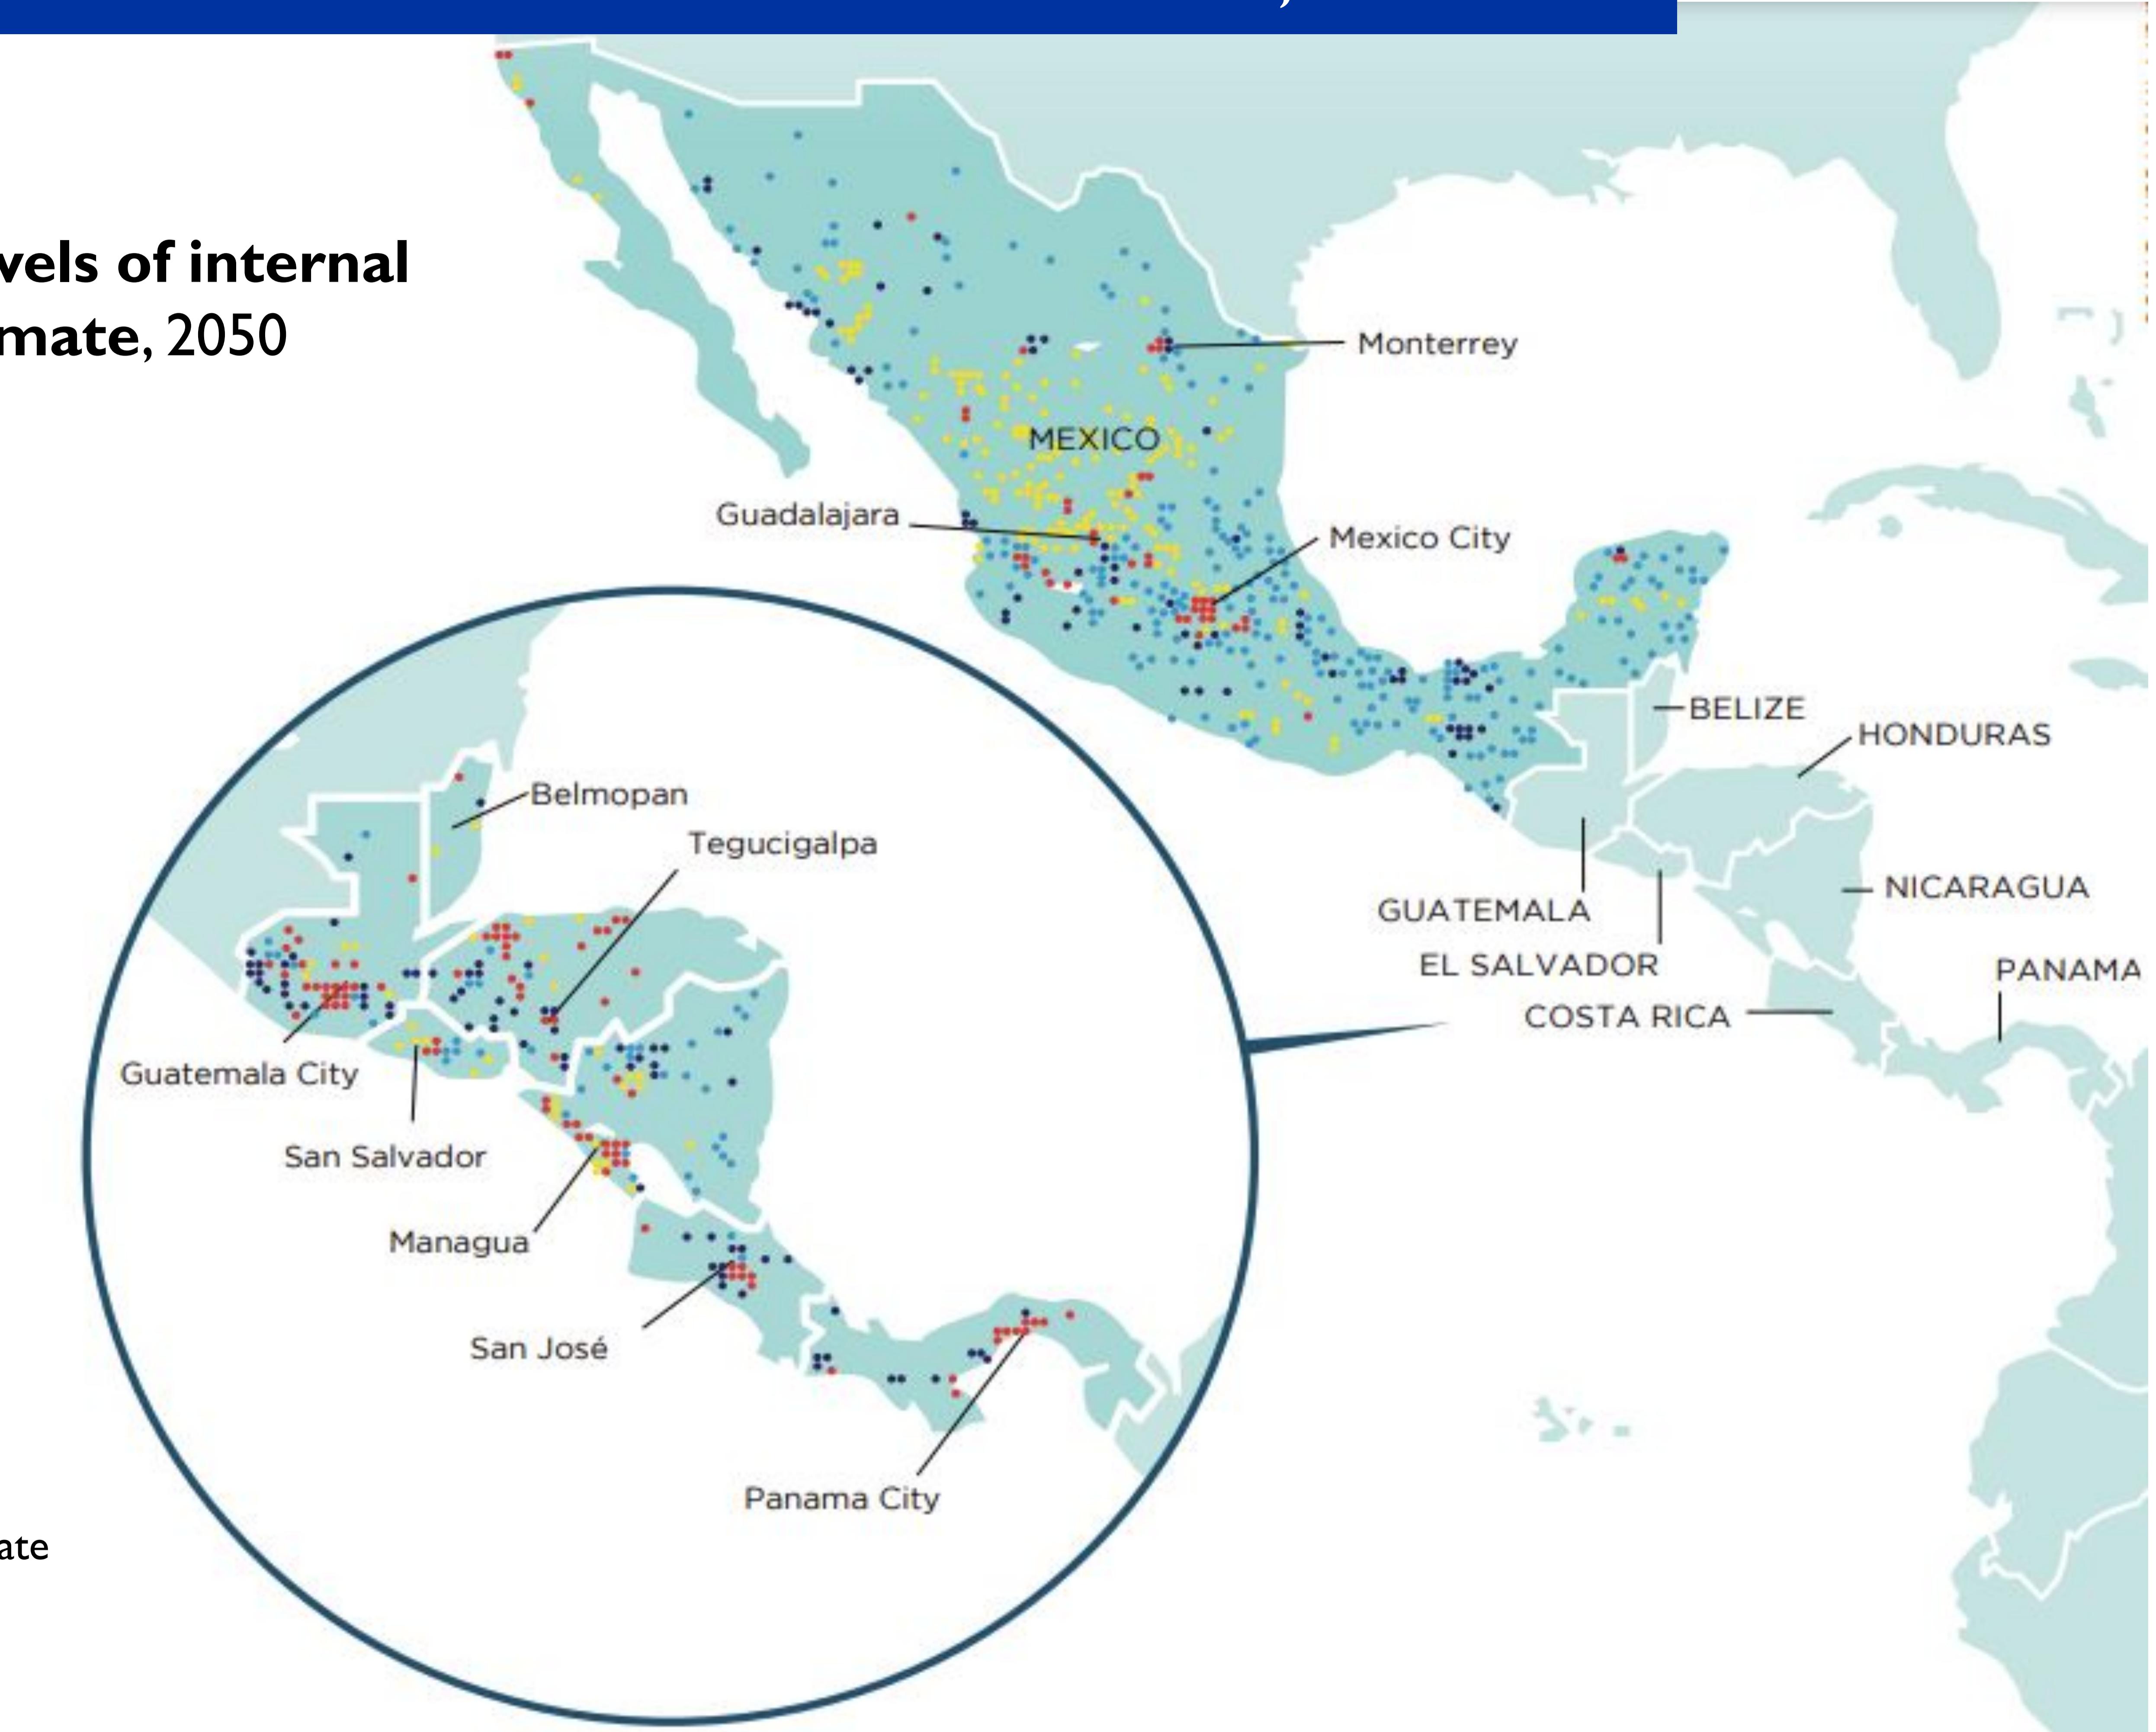

Moderate certainty of high levels of immigration due to climate

High certainty of high levels of emigration due to climate

Moderate certainty of high levels of emigration due to climate

Data and information on migration: Tools and challenges

Who is represented in the data on migration?

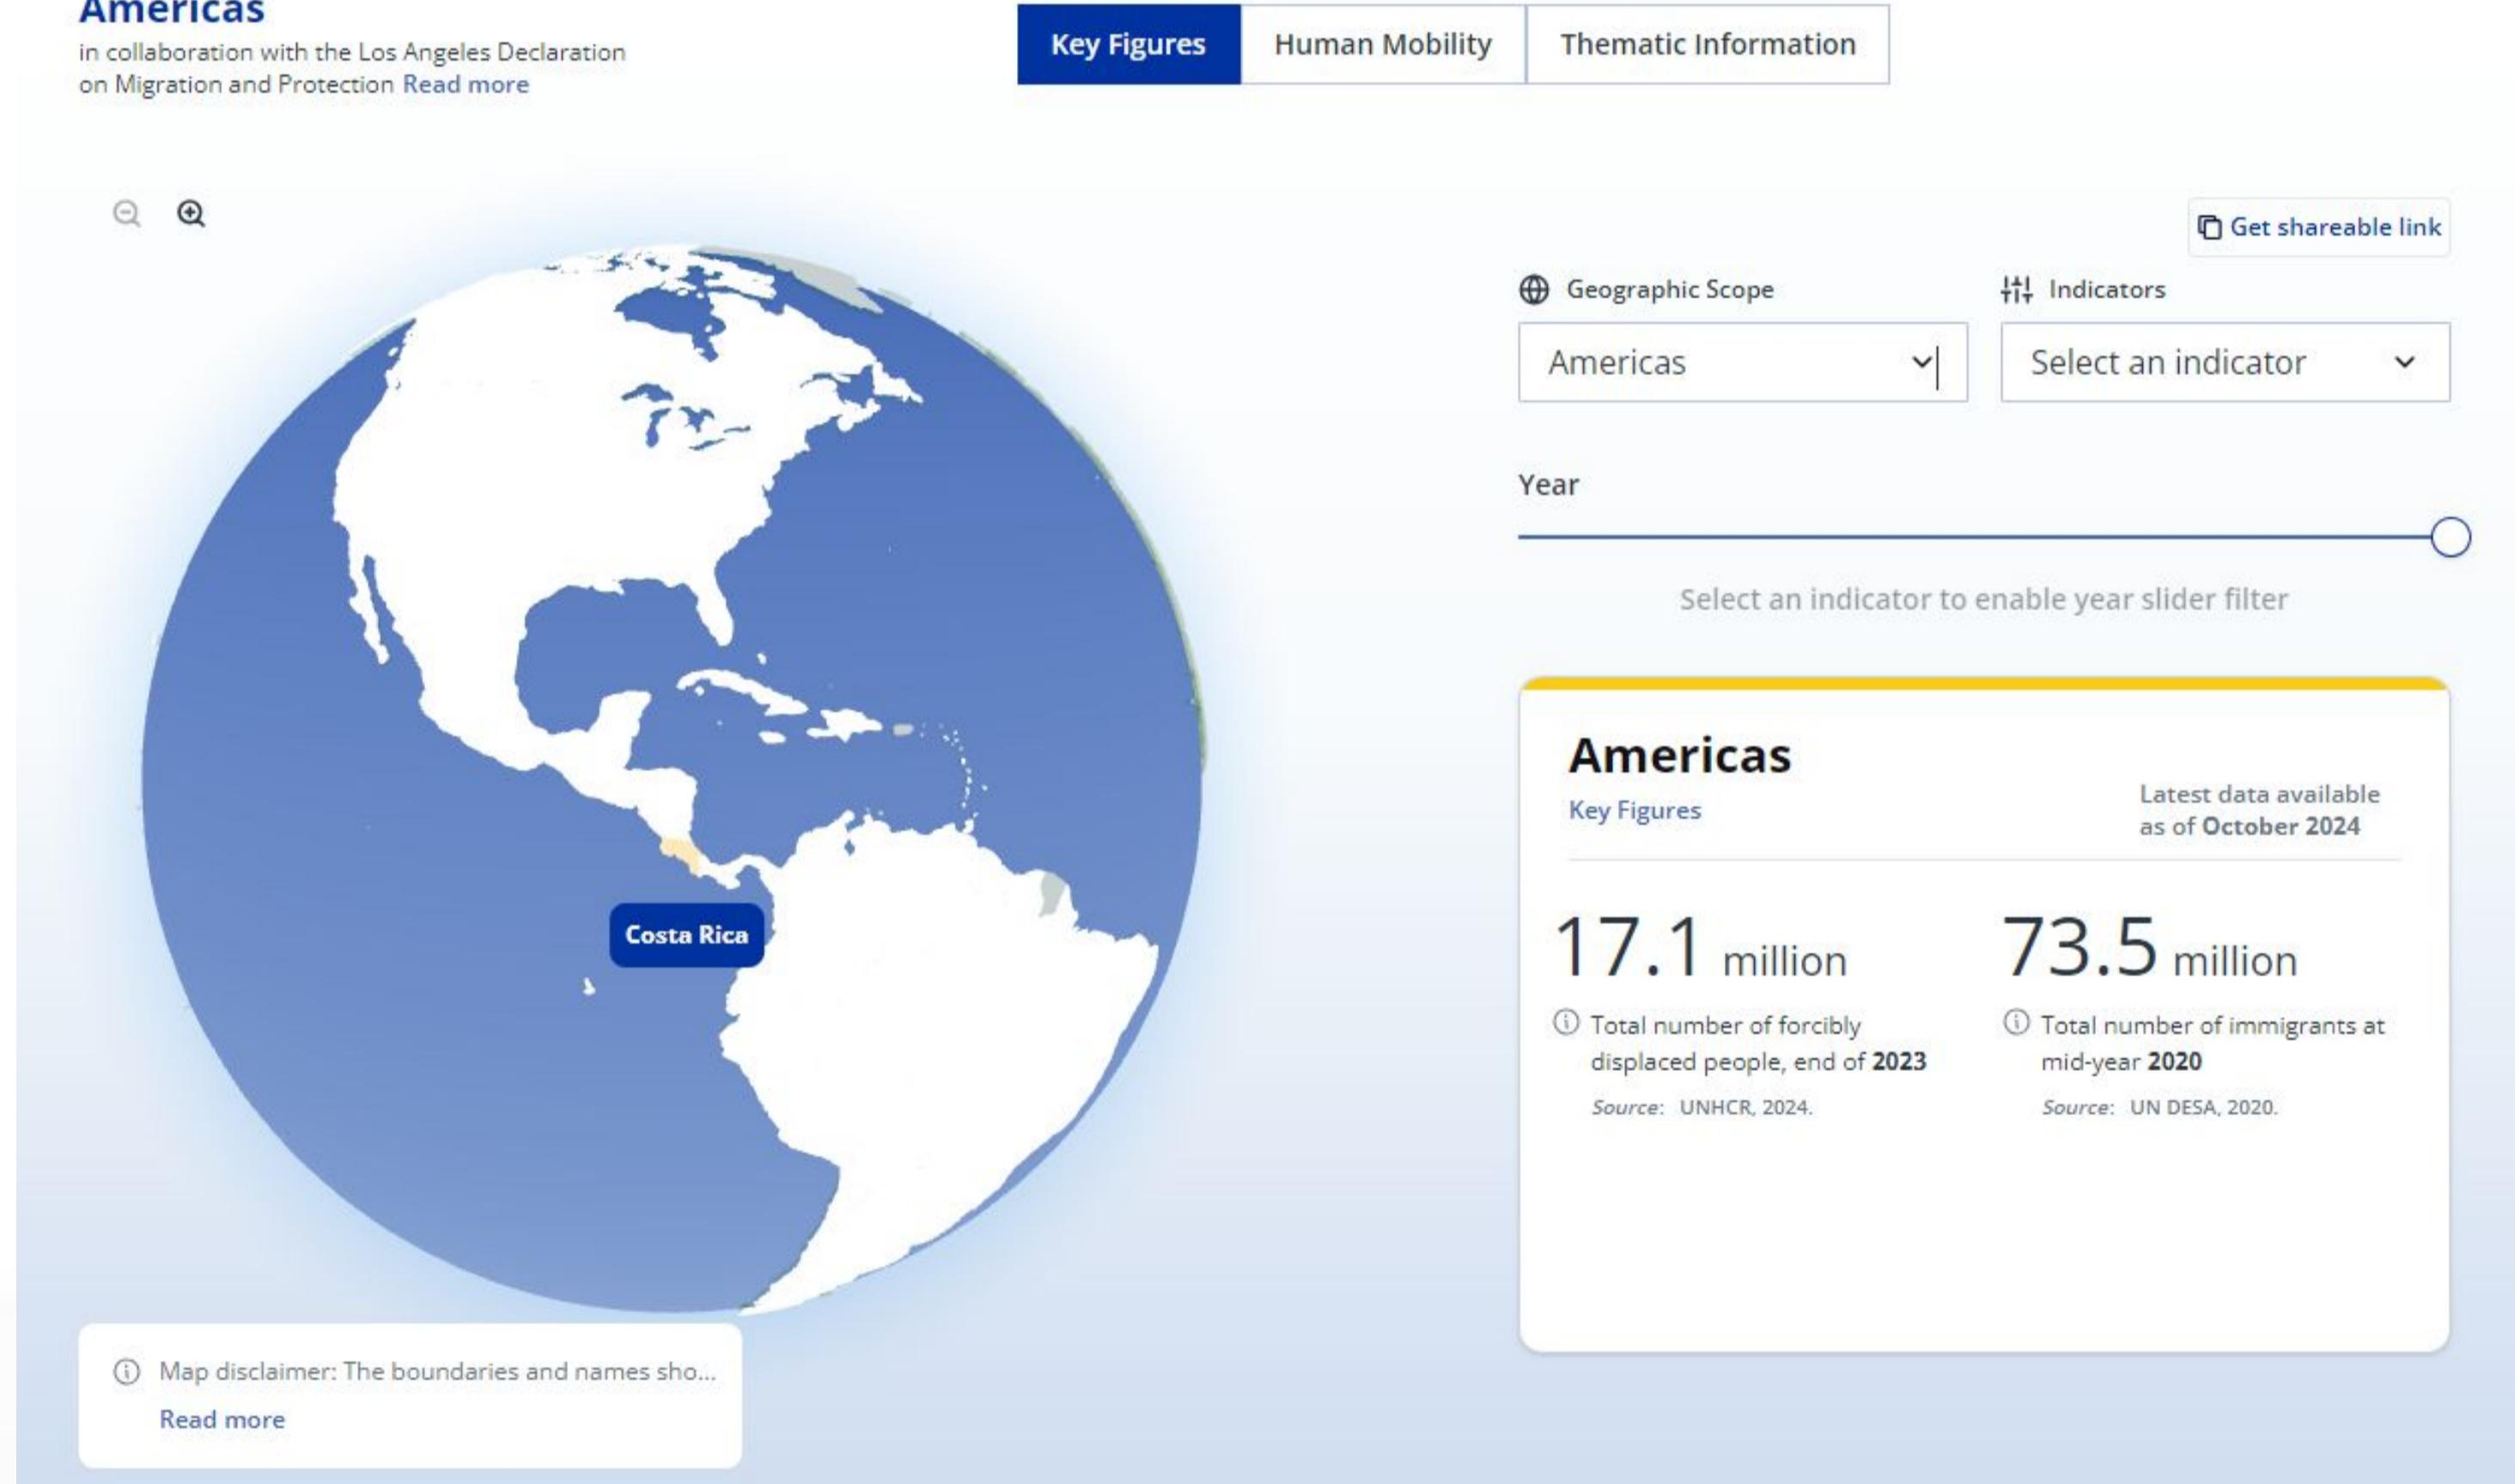

What economic contributions and opportunities do migrants bring?

Migration Data Portal

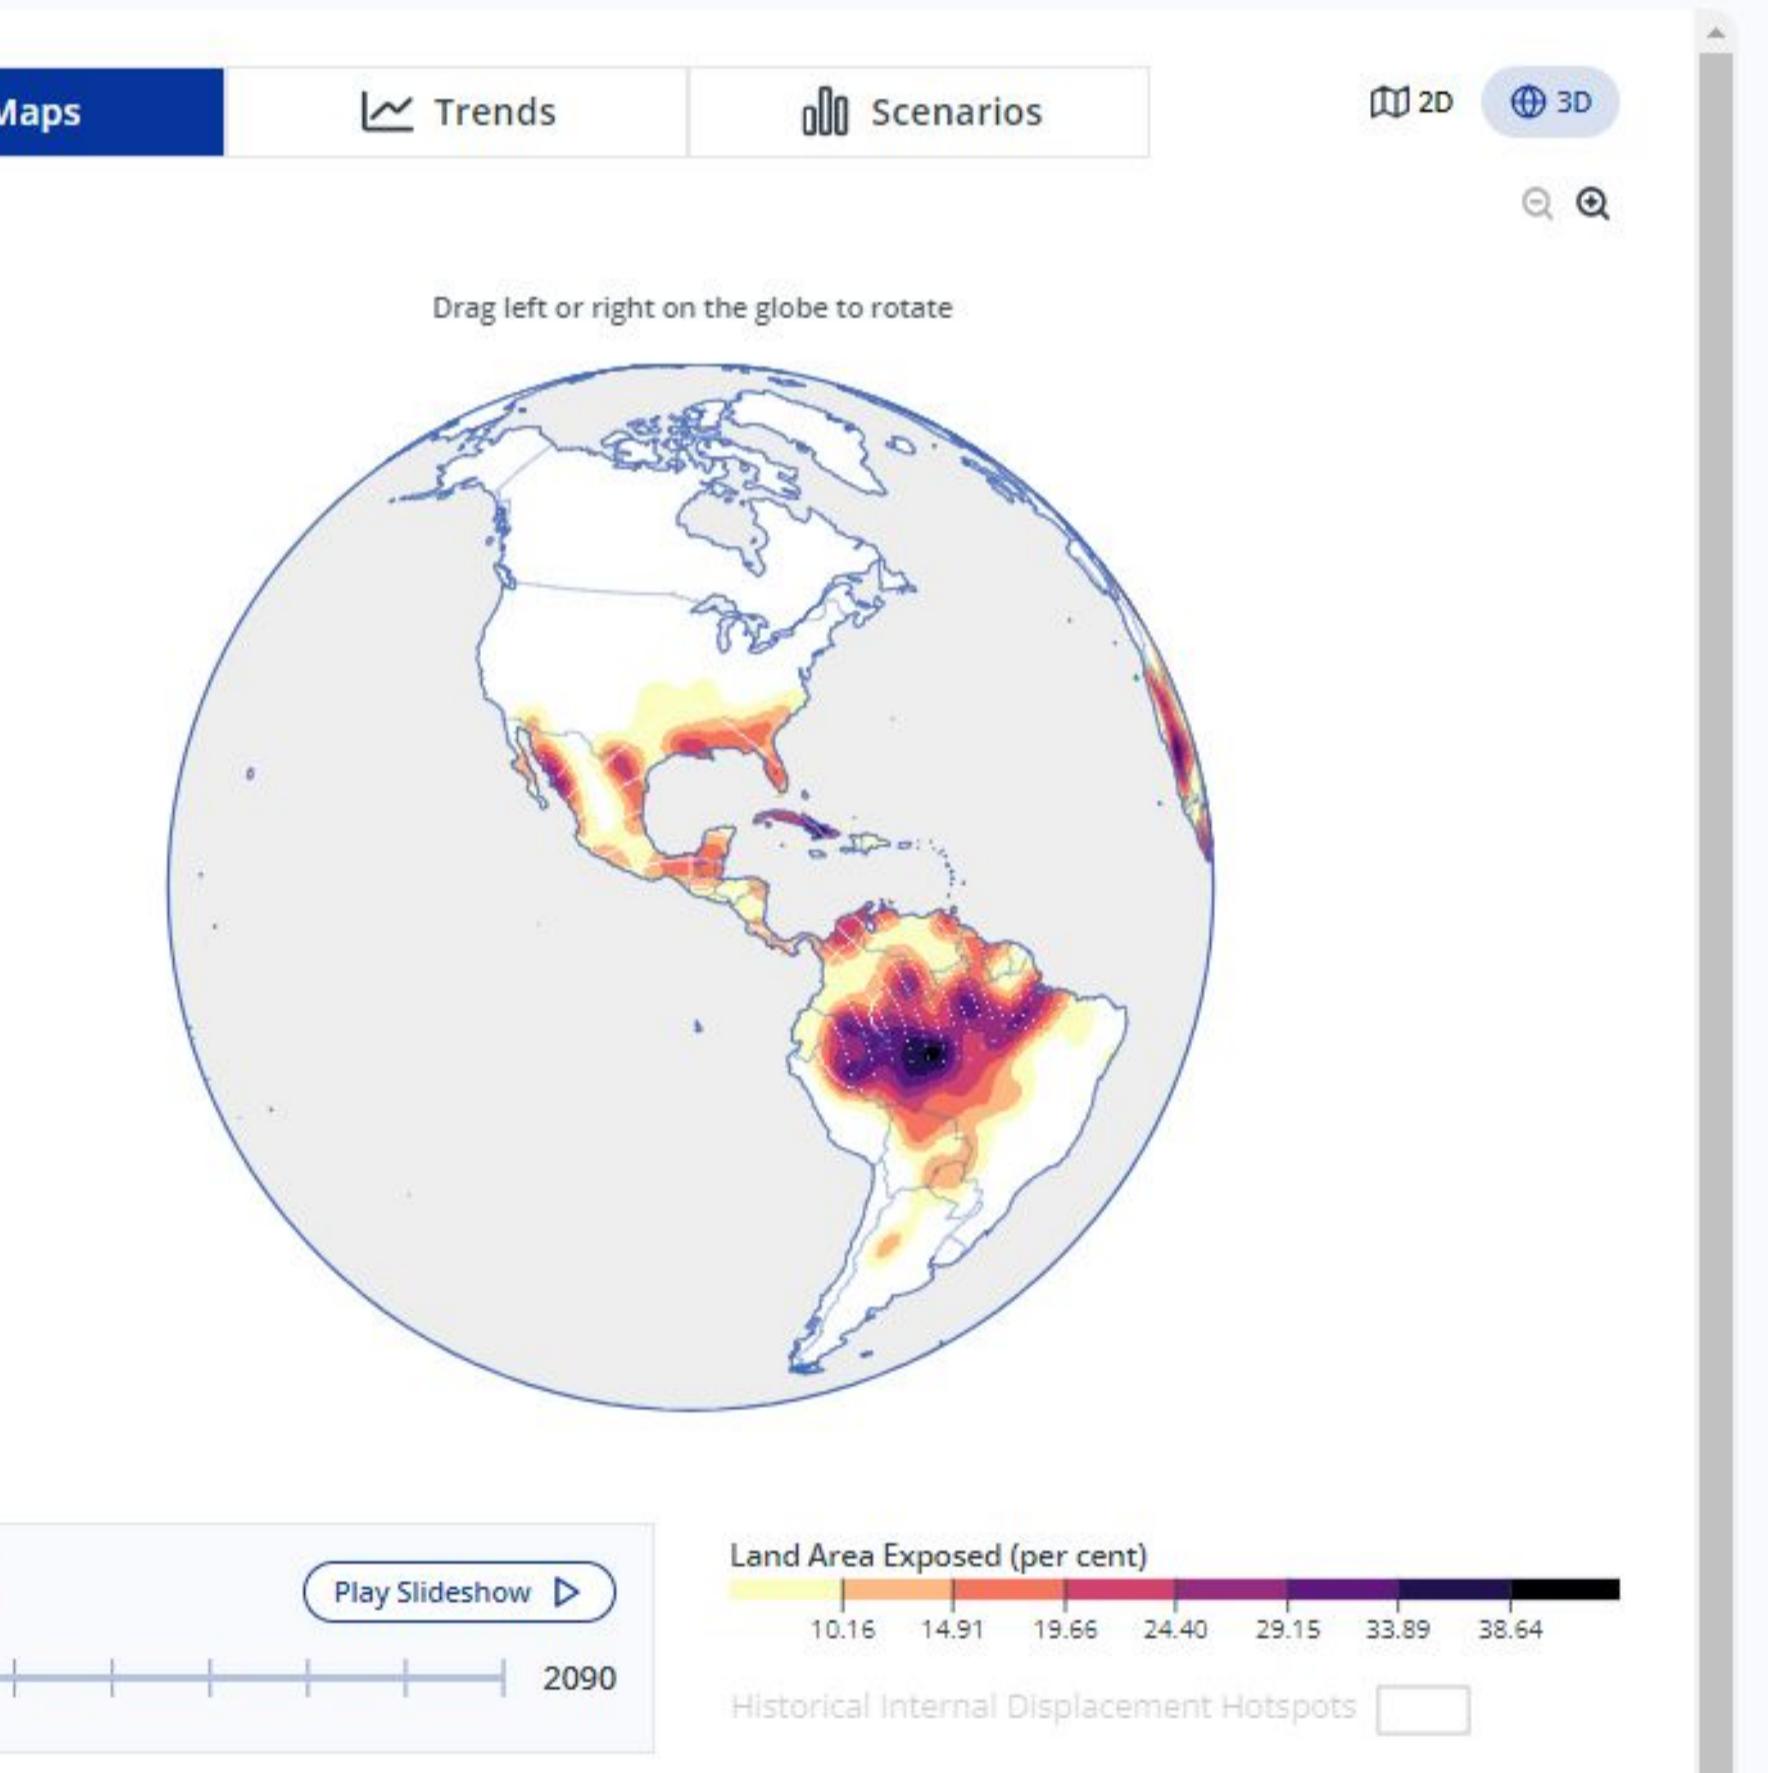

The Migration Data Portal is a unique space to access the latest complete sets of **migratory statistics**, as well as reliable information on migration data from around the world.

Americas
in collaboration with the Los Angeles Declaration on Migration and Protection [Read more](#)

Indicators from all countries of the Americas

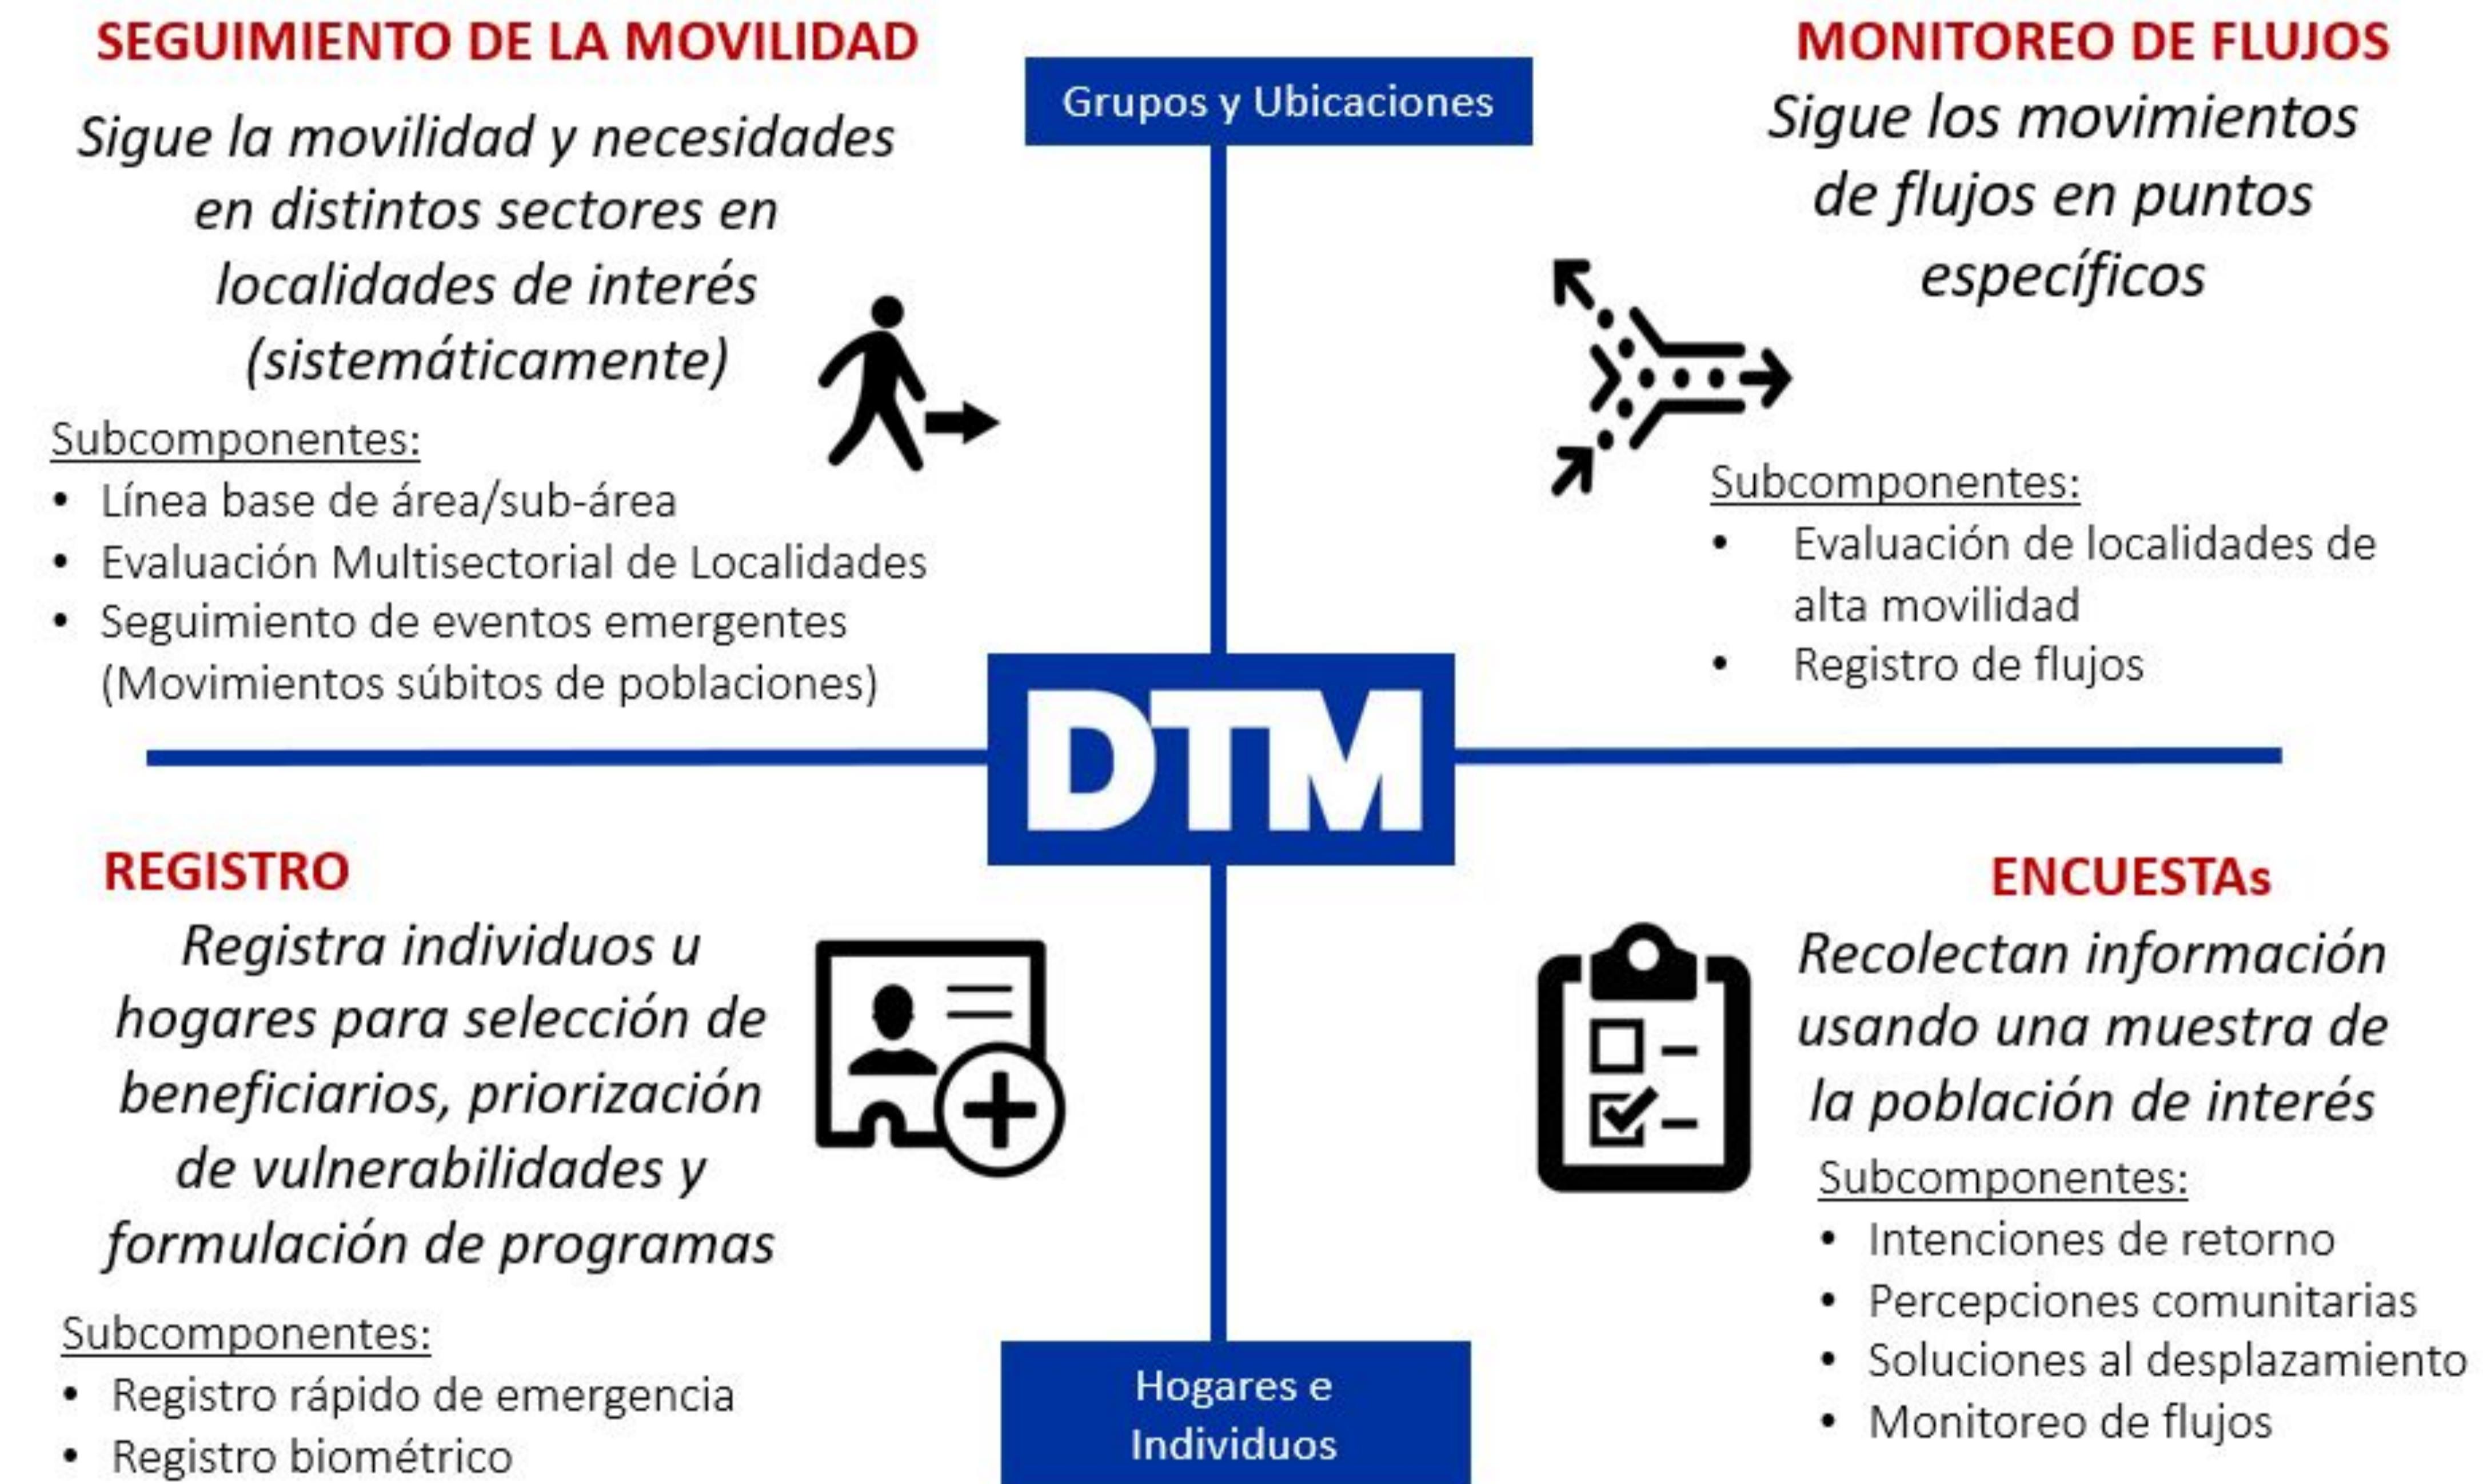

Climate Mobility Impacts

Climate projections

Displacement Tracking Matrix

The **Displacement Tracking Matrix (DTM)** is an IOM tool that monitors the movement of displaced populations. It collects and analyzes key data to help those responsible for decision making to provide appropriate assistance. It captures information on movements and needs of these populations, providing a panorama of its evolution. It was conceptualized in 2004 en Iraq and has undergone improvements over the years. It is currently an official IASC tool for the context of internal displacements.

Challenges

Difficulty of collecting data in a periodic and timely manner by counterparts

Distinct systems and capacities for generating information

Data that is not disaggregated affects its quality

Data gaps and incomplete information

Heterogeneity in the understanding of concepts

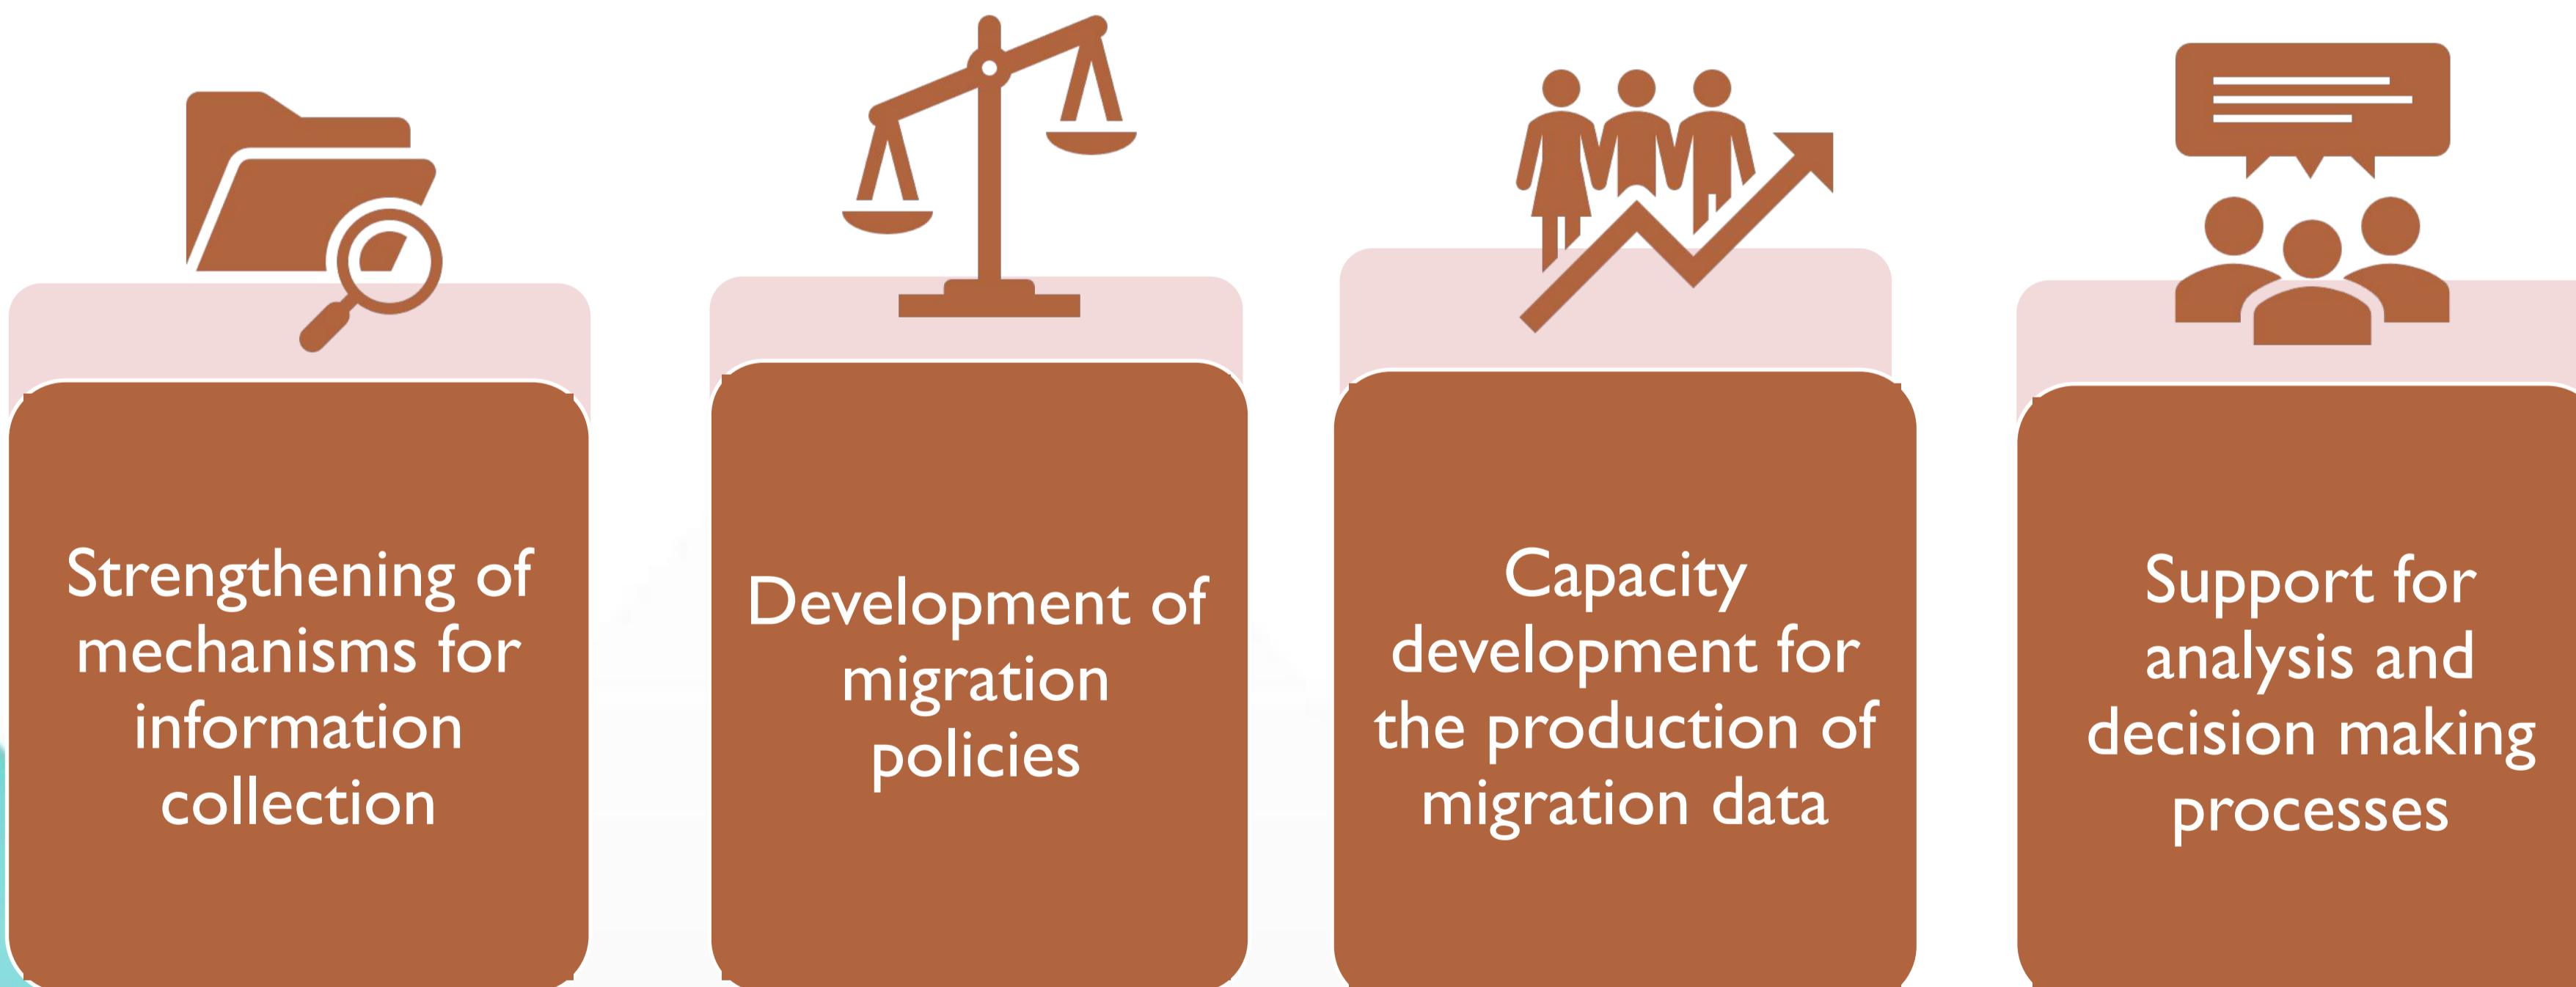

Lack of **macro classifications and concepts**

Need for investment in migratory data

Different definitions due to age categories

Support to OCAM and SICA for the si-Estad migration module

Developed as an **information system** for visualizing relevant migration data at a regional level to support **analysis and decision making processes**.

Training on migration data

Latin American and Caribbean Economic System

Regional intergovernmental body, via the [Panama Convention](#). [Latin American Economic System \(SELA\)](#). SELA is composed of 25 countries of Latin America and the Caribbean.

Last month, a training was organized in coordination with ECLAC and UNFPA on migratory data with the participation of government and civil society actors. It addressed topics like the economic benefits of migration, the creation of narratives with data, and the importance of data in decision making.

Turning Data into Policy

Data-driven Policy

Key Questions:

- How many immigrants are there?
- What are their characteristics?
- Where in the country do they live?
- Who is not being counted?

Key Considerations:

- Adapting information systems
- Data-sharing agreements
- Data integration systems
- Clear governance & policy frameworks

Immigration Data Matters
